97BGB0L ANGUS BULLS

THURSDAY 23rd FEBRUARY at 4.00pm

On property, 420 Fosters Lane, Mortlake Sale day inspection from 1.00pm

Inspection afternoon on Thursday 16th February from 1:00pm

SALE INFORMATION

INSPECTION:

We encourage buyers to inspect the bulls prior to sale day. It allows us to assist you select the sire best suited to your needs. Phone us on 0419 884 839 and advise us of your intending visit.

Lots catalogued are available for inspection from 1.00pm, Thursday 23rd February.

FREE DELIVERY:

Banquet offers free delivery to the buyer's nearest town on route to Adelaide, SA and Emerald, QLD and to the property within Vic.

STOCK HEALTH:

Banquet is MN2 accredited under the Bovine Johnes Disease Market Assurance Program. Certificate Number VC128. All bulls have been Vet checked by Dr Craig Wood, Terang.

They have all undergone a physical examination of external genitalia and conformation. At the time of the examination involving a crush side semen

National Johne's Program

assessment was performed. The crush side test involves visualisation of the penis and collection of semen. This semen is then analysed for density, mass motility and forward motility. All bulls in this catalogue were considered sound at the time of the examination.

They have been vaccinated with pestiguard, vibriovac and 7 in 1.

Any bulls purchased for QLD will be vaccinated against 3 day sickness and receive the 3 germ tick fever vaccination.

REBATE TO OUTSIDE AGENTS:

Outside agents accompanying a purchaser to the sale are entitled to a 5% rebate. Please refer to page 3 for further detail.

AFTER SALE SERVICE:

Banquet is renowned for excellence in providing after sales service. If in doubt, speak with us or with any one of our many satisfied clients.

THE BANQUET BULL GUARANTEE:

All bulls are backed by a 3 YEAR GUARANTEE. In the event of a bull proven to be infertile or incapable of natural service the vendor can either offer a suitable replacement if available or issue a credit for future sales. The credit is a pro-rata value of the bull minus the salvage value.

The guarantee can only apply if the bulls' incapacity is not caused by injury or disease since taking delivery. Any claim must be accompanied by a relevant veterinary certificate.

The vendor retains the right to obtain independent veterinary confirmation of any claim.

It is important to understand that normal care must be taken and good husbandry practices observed, as we cannot replace a bull that is injured or dies for any reason. As such, we recommend you insure animals against injury. A representative of an insurance service organisation will be available on sale day.

RECESSIVE GENETIC CONDITIONS (see pages 62 and 63)

All bulls in this Sale are free of AM, NH, CA and DD by parentage, or have been tested free.

NO CARRIER BULLS ARE BEING OFFERED FOR SALE

FURTHER INFORMATION:

Contact Stephen or Noeleen Branson by phoning or Email bar

0419 884 839 or 0437 029 992 banquetangus@westvic.com.au

OUTSIDE AGENT COMMISSION REBATES

5% rebate will be paid to all agents that attend and who purchase with or on behalf of their clients and settle within seven days of sale date.

2% rebate will be paid to all agents introducing clients that purchase but not accompanied by them to the sale.

A written introduction must be received by the vendor 48 hours prior to the sale and accounts must be settled within 7 days of the sale date.

SIGHT UNSEEN PURCHASING PROGRAM

100% satisfaction guarantee. Available to buyers who cannot attend the Sale.

For those purchasers who have discussed their requirements with us prior to the Sale we offer a 100% money back guarantee if the purchaser is not completely satisfied with their purchase. We must be notified within seven days of taking delivery. However the purchaser will be responsible for return transport costs.

FOREWORD

"I have just won the quadrella" was the excited exclamation from one of our long term supporters.

> "I have water in the dams Grass in the paddocks Good cattle prices and Money in the bank."

It is indeed a unique and wonderful position for livestock producers to enjoy.

But l still remember 2014. Drought, over supply of cattle, poor prices, bank foreclosures and family breakdowns. What has really changed since then? Only rain. Our circumstances are very different but not the system.

One sector prospers at the pain of another. In 2014 the processors raped and pillaged the producers, currently the producers are seeking revenue. It is impossible for us to know just how tough it is for the processing sector currently but I want them to remain viable and continue their investment in facilities, technologies and markets.

The system of moving red meat from paddock to plate must change. It must be fairer, transparent and sustainable for all sectors. It is now up to the producers to drive this change because we have the "whip handle" at the moment. Now we must be proactive and demand innovation. With the technologies and intelligence available in 2017 there must be a superior method. If our Industry does not innovate then when the circumstances change, the devastating conditions of 2014 will return. I don't want that, our children don't want that and our bankers don't want that. But we will only have ourselves to blame.

What are you contributing to the next generation of Livestock producers?

All of us at Banquet wish to take this opportunity to extend our gratitude to John and Jenny and Mark and Anna Gubbins of Coolana for their 45 Years of service to our Industry. We have admired their commitment to Coolana, to the Angus breed and to the Livestock Industries. We wish Mark, Anna and Max every success in their continuing endeavours. We have always enjoyed the spirit of "co-opetition" with Coolana and their Dispersal Sale on 2nd and 3rd of March will be hugely successful.

On February 16th we are conducting a "Bull Testing Seminar" this is an opportunity to learn what efforts we take to minimise the risks of a disappointing joining performance with a Banquet bull. Dr. Tracy Sullivan is flying in from Queeensland to assist Dr. Craig Wood present the seminar. See leaflet for more information. All beef producers regardless of breed preference are most welcome.

In closing Noeleen, Gordon, Dianna, Hamish and I wish you all a safe and kind 2017. We look forward to sharing February 23rd with as many as possible.

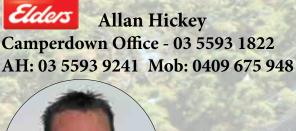

Please plan to stay after the sale to enjoy our hospitality.

Please visit our website to view photos of these Sale Bulls. www.banquetangus.com.au

Radar W42 was selected for these joinings based on his exceptional calving ease, strong growth and carcase. He is outstanding in his hair type and with a soft fine skin. Radar sold at the 2003 National Show and Sale for \$40,000. His dam, Banquet Kite T59, produced six sons and numerous grandsons used at Banquet. Her 26 sons have averaged \$9,600. A daughter holds the record price for a female sold at Sydney Show at \$38,000.

BANQUET FEATURE SIRES

ABERDEEN ESTATE HOMER H70

Te Mania Berkley B1
Sire: TE MANIA EMPEROR E343
Te Mania Lowan Z74

Homer H70 was purchased at the Aberdeen dispersal in partnership with Anvil Stud. His pedigree is a "who's who" of record price Angus cattle. His sire Emperor E343 was the Australian record holder at \$91,000. His dam Dream F21 is the record holder at \$48,000. Her half sisters have sold for \$45,000 and \$38,000. The first calves by Homer show great promise. They are long bodied, fine shouldered, soft coated and deep bodied. His first son sold at our Spring '16 Bull Sale to Steve McLeod for \$14,000. We expect the daughter of Homer to make a major contribution.

BANQUET FEATURE SIRES

BANQUET HARMAN H261

Hingaia 469 (N.Z)
Sire: BANQUET XPLANATION X060
Banquet Dream V104

Atahua Legacy 26-90 (N.Z) **Dam: VERMONT IRENE W47**Banquet Irene L143

Harman H261 topped our 2014 Sale at \$32,000 when he was purchased by the Blyth family, Fernleigh Stud. H261 replaced his sire , X060, in our sire team. The daughters of X060 are exceptional and the progeny of H261 show the same promise. Vermont Irene W47, the dam of H261, has an incredibly powerful head and jaw. She is heavy boned and incredibly thick. A powerhouse of a cow.

S A F 598 BANDO 5175 Sire: BANQUET ABODE A005 Banquet Nanny V44 Banquet Merlot X135

Dam: BANQUET SARAH A337

Ythanbrae N47

Whenever we need to add more bone, volume and substance to a cow Hansen H279 is our choice. He had a huge head, strong jaw and thick hindquarter. As his EBV's suggest his calves are larger born but we have not experienced any calving difficulties. Abode A005, sire of H279, sold for \$20,000 to Forres Stud. His progeny featured at their dispersal. With Quarterway and Shingle Hut we repurchased A005. We have retained a half brother to H279 and a half sister sold for \$12,000. Hansen H279 was purchased by Barry Pitt.

Major M004 is a very special genetic combination. He will develop into a powerful, thick sire. But his greatest potential lies in the daughters he will add to your herd. Study his pedigree, it is a combination of maternal magic. Hingaia 469 - famous for the productivity and longevity of his daughters, we are still flushing his 16 year old daughters. 469 also sired the \$150,000 Millah Murrah Kingdom. Vermont Dream Y301 was certainly the most influential cow to come from Vermont. Her daughters sold for \$45,000, \$38,000 and \$48,000. Aberdeen A349 was used before selling to Quarterway Angus. His daughters were the feature sire group at our "Belles of Banquet" Sale, so we have used him in AI and ET. Dream V104 has been one of the most prepotent dams at Banquet. Daughters of her son, the \$30,000 Xplanation X060, are highly valued at Banquet, throughout Aust. and N.Z. Our feature "F" and "G" cows are by her sons Zappa Z236 and Day Dream D053. Both still in use. Her daughter D310, dam of Major M004, was flushed before selling at our "Belles of Banquet" for \$27,000 to Heart Angus. Her sons have sold to \$15,000. The two flush sisters to M004 are outstanding. Major M004 has an exceptional heritage. Choose him to create a dynasty in your herd.

A strict Country 1. 26 and

L287 has that shiny skin and fine hair that is characteristic of the H261 progeny. The \$32,000 H261 has bred very well at Fernleigh and Banquet. We selected him for use based on his maternal traits and his first daughters reinforced that belief. The dam of L287, A266, is a prolific producer at Banquet. Her daughters are outstanding.

IMPORTANT NOTICES FOR PURCHASERS

~ SALE CATALOGUE DISCLAIMER ~

All reasonable care has been taken by the vendor to ensure that the information provided in this catalogue is correct at the time of publication. However, neither the vendor nor the selling agents make any other representations about the accuracy, reliability or completeness of any information provided in this catalogue and do not assume any responsibility for the use or interpretation of the information included in this catalogue. You are encouraged to seek independent verification of any information contained in this catalogue before relying on such information.

~ DNA PATERNITY VERIFICATION ~

It is a requirement of Angus Australia that all bulls used to sire calves for registration in the Angus Australia Herd Book Register, Red Angus Register or Angus Performance Register must have been DNA paternity verified if they are born in or after the 'Y' year (2003). Buyers intending to use bulls listed in this catalogue to produce calves to be registered in these registers should obtain DNA paternity verification on those bulls before they are used for breeding.

~ PRIVACY INFORMATION ~

In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by Angus Australia in certain circumstances. If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must complete the form included below and forward it to Angus Australia. If the form is not completed, the buyer will be taken to have consented to the disclosure of such information.

BUYER'S OPTION TO OPT OUT OF DISCLOSING PERSONAL INFORMATION TO THE ANGUS AUSTRALIA

TO THE ANGUS AUSTRALIA If you do not complete this form, you will be taken to have consented to Angus Australia using your name, address and phone number for the purposes of effecting a change of registration of the animal(s) that you have purchased, maintaining its databases and disclosing that information to its members on its website. I, the buyer of animals with the following registration numbers ______from member (name) do <u>not</u> consent to Angus Australia using my name, address and phone number for the purposes of effecting a change of registration of the following animal(s) that I have purchased, maintaining its databases and disclosing that information to its members on its website. Signature: *Date:* Please forward this completed consent form to Angus Australia, Glen Innes Road, Locked Bag 11, Armidale NSW 2350. If you have any queries, please telephone 02 6772 3011 or e-mail office@angusaustralia.com.au.

RECESSIVE GENETIC CONDITIONS

INFORMATION FOR BULL BUYERS

This is information for bull buyers about the recessive genetic conditions, Arthrogryposis Multiplex (AM), Hydrocephalus (NH), Contractural Arachnodactyly (CA) and Developmental Duplications (DD).

Putting undesirable Genetic Recessive Conditions in perspective

All animals, including humans, carry single copies (alleles) of undesirable or "broken" genes. In single copy form, these undesirable alleles usually cause no harm to the individual. But when animals carry 2 copies of certain undesirable or "broken" alleles it often results in bad consequences. Advances in genomics have facilitated the development of accurate diagnostic tests to enable the identification and management of numerous undesirable or "broken" genes. Angus Australia is proactive in providing its members and their clients with relevant tools and information to assist them in the management of known undesirable genes and our members are leading the industry in their use of this technology.

Key point: With today's DNA tools undesirable genetic conditions can be managed!

What are AM, NH, CA and DD?

AM, NH, CA and DD are all recessive conditions caused by "broken" alleles within the DNA of individual animals. When a calf inherits 2 copies of the AM or NH alleles their development is so adversely affected that they will be still-born.

In other cases, such as CA and DD, calves carrying 2 copies of the broken allele may reach full-term. In such cases the animal may either appear relatively normal, or show physical symptoms that affect their health and/or performance.

Key point: The number of reported observations of AM, NH, CA and DD calves is very low and there is certainly no need for panic.

How are the conditions inherited?

Research in the U.S. and Australia indicates that AM, NH, CA and DD are simply inherited recessive conditions. This means that a single gene (or pair of alleles) controls the condition. For this mode of inheritance two copies of the undesirable allele need to be present before the condition is seen; in which case you may get an abnormal calf. A more common example of a trait with a simple recessive pattern of inheritance is black and red coat colour.

Animals with only one copy of the undesirable allele (and one copy of the normal form of the allele) appear normal and are known as "carriers".

What happens when carriers are mated to other animals?

Carriers, will on average, pass the undesirable allele to a random half (50 %) of their progeny.

When a carrier bull and carrier cow is mated, there is a 25% chance that the resultant calf will inherit two normal alleles, a 50% chance that the mating will result in a carrier (i.e. with just 1 copy of the undesirable allele, and a 25% chance that the calf will inherit two copies of the undesirable gene.

If animals tested free of the undesirable gene are mated to carrier animals the condition will not be expressed at all. All calves will appear normal, but approximately half (50%) could be expected to be carriers.

Key point: For the condition to be expressed the undesirable gene needs to be present on both sides of the pedigree and both the sire and dam need to be a carrier.

How is the genetic status of animals reported?

DNA-based diagnostic tests have been developed which can be used to determine whether an individual animal is either a carrier or free of the alleles resulting in AM, NH, CA or DD.

Angus Australia uses advanced software to calculate the probability of (untested) animals to being carriers of AM, NH, CA or DD. The software uses the test results of any relatives in the calculations and the probabilities may change as new results for additional animals become available.

The genetic status of animals is being reported using five categories:

| AMF | Tested AM free |
|------|--|
| AMFU | Based on pedigree AM free – Animal has not been tested |
| AM% | % probability the animal is an AM carrier |
| AMC | Tested AM-Carrier |
| AMA | AM-Affected |

For NH, CA and DD, simply replace AM in the above table with NH, CA or DD.

Registration certificates and the Angus Australia web-database display these codes. This information is displayed on the animal details page and can be accessed by conducting an "Animal Search" from the Angus Australia website or looking up individual animals listed in a sale catalogue.

Key point: The genetic status of an animal is subject to change and will be re- analysed and adjusted each week as DNA test results of relatives are received.

<u>Implications for Commercial Producers</u>

Your decision on the importance of the genetic condition status of replacement bulls should depend on the genetics of your cow herd (which bulls you previously used) and whether some female progeny will be retained or sold as breeders.

Most Angus breeders are proactive and transparent in managing known genetic conditions, endeavouring to provide the best information available. The greatest risk to the commercial sector from undesirable genetic recessive conditions comes from unregistered bulls with unknown genetic background. The genetic condition testing that Angus Australia seedstock producers are investing in provides buyers of registered Angus bulls with unmatched quality assurance.

For further information contact Angus Australia's Breed Development and Innovation Manager at (02) 6773 4602.

At Landmark, you can rely on a vast network of committed advisors who have the resources and the expertise for all your livestock needs. Our combined experience and our knowledge of the livestock industry, means we can add real value to your business and help you make the most of every opportunity. We understand the buying and selling of sheep and cattle, and with access to more domestic markets and international partnerships, we can secure better prices for you. That's why more Australian farmers look to us.
