## SALE INFORMATION

**STARTING TIME:** 11.00 am

**VENUE:** This Bull Sale will be held at Banquet, 184 Steeles Lane, Mortlake, Victoria.

### **INSPECTION:**

We encourage buyers to inspect the bulls prior to Sale Day.

Presale Inspection Day

Thursday 25th August 9.00am to 12 Midday

At 184 Steeles Lane, Mortlake.

Sale day inspection from 9.00am, Friday 2nd September.

**CATERING:** Light lunch will be available.

### **FREE DELIVERY:**

Banquet offers free delivery to the buyer's nearest town on route to Adelaide, SA and Emerald, QLD and to the property within Vic.

### **BULL TESTING:**

All bulls have passed a comprehensive fertility test conducted by Dr. Craig Wood and Dr. Libby Summerell of Terang Mortlake Veterinary Clinic including – examination for structural soundness, examination of reproductive organs, measurement of scrotal circumference. They were also checked for semen motility and morphology.

### **Semen Motility**

Sperm cells need to be motile. At about 60um long, they've a way to travel to get the job done. Following collection of a semen sample, a drop is placed on a microscope slide and examined, 'crush side', to assess the percentage of sperm cells moving forward.

### **Semen Morphology**

Morphology is the anatomy or structure of the sperm. It cannot be tested 'crush side' requiring a large specialised laboratory microscope to examine a preserved semen sample, assessing the % normal and % abnormal sperm cells. It can pick up defects in the sperm that 'crush side' testing cannot. The most serious of these defects can see the sperm start to fertilise an egg but fail to result in a viable embryo and the female will fail to fall in calf. Note that Semen Morphology can differ in subsequent samples from the same bull. Stress can cause this and putting a bull through a sale will generally cause some stress.

### **SEMEN RETAINED:**

Banquet will retain semen from some of the bulls in this Sale for within herd use or progeny testing. These bulls will be nominated on the supplementary sheet.

### **THE BANQUET BULL GUARANTEE:**

All bulls are backed by a 3 YEAR GUARANTEE. In the event of a bull proven to be incapable of natural service the vendor can either offer a suitable replacement if available or issue a credit for future sales. The credit is a pro-rata value of the bull minus the salvage value. The guarantee can only apply if the bulls' incapacity is not caused by injury or disease since taking delivery. Any claim must be accompanied by a relevant veterinary certificate. The vendor retains the right to obtain independent veterinary confirmation of any claim.

It is important to understand that normal care must be taken, and good husbandry practices observed, as we cannot replace a bull that is injured or dies for any reason. As such, we recommend you insure animals against injury. A representative of an insurance service organisation will be available on Sale Day.

## SALE INFORMATION

### **NATIONAL CATTLE HEALTH STATEMENT:**

Banquet has its own Biosecurity Plan prepared in conjunction with our local vet Dr Craig Wood. We are a J-BAS 8 herd.

See page 33 for our National Cattle Health Declaration.

### **STOCK HEALTH:**

All bulls have been ear notched tested negative for Pestivirus. They have also been vaccinated with Pestiguard vaccine (pestivirus), Vibriovax (vibriosis), 7 in 1 Vaccine (leptospirosis) and drenched with Dectomax. Any bulls purchased for Queensland will be vaccinated against 3 day sickness and receive the 3 germ tick vaccine upon request.

### **RECESSIVE GENETIC CONDITIONS**

All animals in this Sale are free of AM, NH, CA and DD by parentage, or have been tested free.

### **NO CARRIER ANIMALS ARE BEING OFFERED FOR SALE**

### **REBATE TO OUTSIDE AGENTS:**

Outside agents accompanying a purchaser to the Sale are entitled to a 5% rebate. Please refer to page 4 for further detail.

### **AFTER SALE SERVICE:**

Banquet is renowned for excellence in providing after Sales service. If in doubt, speak with us or with any one of our many satisfied clients.

### **FURTHER INFORMATION:**

banquetangus@westvic.com.au

# OUTSIDE AGENT COMMISSION REBATES

5% rebate will be paid to all agents that attend and who purchase with or on behalf of their clients and settle within seven days of sale date.

2% rebate will be paid to all agents introducing clients that purchase but not accompanied by them to the sale. A written introduction must be received by the vendor 48 hours prior to the sale and accounts must be settled within 7 days of the sale date.

## SIGHT UNSEEN PURCHASING PROGRAM

100% satisfaction guarantee.

Available to buyers who cannot attend the Sale.

For those purchasers who have discussed their requirements with us prior to the Sale we offer a 100% money back guarantee if the purchaser is not completely satisfied with their purchase. We must be notified within seven days of taking delivery. However the purchaser will be responsible for return transport costs.

# BANQUET FEATURE SIRES

## BANQUET PLANET P333

Musgrave Big Sky (USA)  
**Sire: WATTLETOP MOONSHINE M42**  
 Wattletop Dandloo K48

Banquet Everard E019  
**DAM: BANQUET MARTINA M194**  
 Banquet Martina J534

Planet P333 impressed us with the soundness of his structure and overall balance. He was thick, deep flanked and with a massive hindquarter. His extra softness and doing ability was a feature. P333 has two sons in this sale and they show all his traits. P333 topped the "heifer bull" section of the Autumn 2020 sale at \$21,000 to Ken and Mary Frost. Sadly P333 was destroyed in the tragic bushfire of January 2022 at Poolaijelo.

## BANQUET NUTTELLA N462

Banquet Duncan D412  
**Sire: BANQUET JAMBEROO J507**  
 Forres Wilcoola D107

Millah Murrah Doc F159  
**DAM: BANQUET YENDI K224**  
 Banquet Yendi D351

It is the consistency of the progeny of Nuttella N462 that has us so excited. Bulls that produce consistent lines of progeny are so much more valuable, and N462 consistently improves so many traits. He adds thickness, depth and do ability to his progeny. He improves structure and temperament. N462 sons achieved the top and second top price at our Autumn Sale at \$62,000 and \$60,000.

## BANQUET KANE K233

Wittalocka X10  
**Sire: BANQUET DUNCAN D412**  
 Banquet Dream A250

Banquet Zappa Z236  
**DAM: BANQUET QUIET F567**  
 Banquet Quiet C359

Kane K233 was a very imposing individual. His strong head, well hooded eye, massive volume and thickness impressed all who viewed him. He transmitted this power to his sons. But it is his daughters that stamp him as an elite sire. They are deep, thick and easy doing. Their udder attachment, teat size and milking ability is exceptional. Their progeny are outstanding. They will influence Banquet for years to come.

BANQUET DREAM G489<sup>PV</sup>

If you value maternal traits and longevity then you should consider R406. He carries two crosses of Day Dream D053. D053 started work as a yearling and retired at 10 years. He sired 308 progeny at Banquet and countless others for clients when he went to help out. His dam, V104, produced 40 progeny before retiring at 14 years. W173, retired at 17 years with 62 progeny. G489 is about to calve again at 11 years, already with 66 progeny. F515 just left at 12 years with 9 natural calves, Her dam, P05, produced 40 calves before leaving at 17 years. It will not surprise to find that R406 is very correct and has a sleek skin.

BANQUET IRENE A266<sup>SV</sup>

R518 is the youngest of the 2020 drop bulls in this sale but in my opinion one of the stars. He has a great head and is super sound in his structure. He has refined shoulders, strong spine and excellent through his hip to pin. He has extra width and capacity while still retaining excellent walking ability. His sire was one of our pick Hallmark sons that was retained until a client was desperate for a very good bull. R518 only has one half brother and he sold to Belchers for \$13,000. Granddam of R518, F493, was a favourite. She has a son at Lot 26, read more about her there.

# SUITABLE FOR JOINING MAIDEN HEIFERS

Lot 13 to Lot 22 have been selected on:

Type – long necks, fine shouldered and moderate bone.

Pedigree – They are sired by proven calving ease sires that have been used by Banquet.

Birth Weight – All these bulls are in the low to moderate actual birth weight range.

EBV – EBV’s of these lots are in the low to moderate range for birth weight EBV.

Remember – Management of the heifers has the greatest impact on calving difficulties.

When you look at S005 and then you look at his pedigree it should give you the same exciting ‘Sensation’ that we feel with this young bull. We really admire his magnificent head and jaw, huge top, muscularity and width that he displays. Then to add he is sired by the super sire Nuttella N462, who sired the two top price bulls in February 2022 sale at \$62,000 and \$60,000. S005 shows everything we love about our Nuttella progeny. Quiet Y091, dam of S005, who lived until she was nearly 18 years old and was still super sound until the day she died. Y091 was a sensational breeder with 6 daughters already making it into the donor team. One son sold in Feb 2021 sale at 12 months old for \$19,000 to Correlup. Three sons sold in Feb 2022 sale, for \$30,000 to K5X Angus, \$26,000 to Wes and Vicki Radke and \$22,000 to the Farley Family. One son was retained and used on stud cows before being sold to a client in desperate need of a top bull, another 4 sons have semen retained for stud use. S005 is a very stylish bull that we like a lot, he is super quiet and in the top 1% of the breed for docility at +48. Did I mention we like him! Please note: S005 has a bone growth on the inside of his near side, hind pastern. Our vet believes it was most likely caused by and injury as a calf. We have never witnessed any lameness and he comes fully guaranteed. Semen Retained.

S048 is a special unit. Again by Meta but this time from, N291, the flush sister to National N278. N278 topped our 2019 Autumn Sale at \$48,000 to Toora West. N291 is an exceptional female, extra length of body with that maternal shape of long neck, fine shoulder and deep body. Excellent udder and teat shape, fine skin, soft hair and very easy doing. Will be a prized donor at Banquet. Her dam, W164, is also the dam of Lot 24. S048 is long and muscular with that great skin and soft hair of both his parents.

BANQUET KITE F643<sup>#</sup>

We had another Prophet son at Lot 16. We are finding that if the cow has sufficient bone, frame and thickness then Prophet can add some extra carcase quality without sacrificing the Banquet type. K333, dam of S112, is one of those cows. She is sired by Duncan D412, from a Zappa Z236 daughter. She is a proper Banquet type cow. We admire the great skin on S112. He is deep bodied with extra flank and easy doing.

S059 is the last son of Prophet in this sale. When we decided to try prophet he was used over the powerful, correct, “Banquet type” females, P012 is another example of a powerful Banquet cow. P012’s flush brother was second top price in February 2020 who sold for \$22,000 to Fernleigh Angus. P012 includes the great Quiet, Dream and Julie cow families. S059’s grandmother, great grandmother and great great grandmother have all been donors. We admire the length, clean front, strong top, style and lovely hip to pin that he offers. He should breed excellent females. Please note: He has a pink eye scar, sells fully guaranteed.

Buying a bull is an investment. This investment should contribute to the genetics and sale income of your herd for many years. If you are to get the most from your new bull, it pays to look after him well, especially in the first season of use. This report discusses management strategies to maximise the productive life of your bulls.

Arrival:

New bull buyers are often concerned about the apparent bad temperament of a bull that seemed quiet enough when purchased. Bulls can become upset and excited in the sale and delivery process. They are subjected to strange yards, different noises, loss of their mates, different people, different handling methods, trucking, unloading, new paddocks and different water and feed. This can upset animals which are normally very quiet.

When the bull arrives home, unload him at the yards into a group of cows or steers. Never jump the bull from the back of a truck into a paddock. Bulls from different origins should be put into separate yards with other cattle, steers or cows, for company.

Provide hay and water, then leave the bull alone until the next day, before giving routine health treatments.

Mating New Bulls:

Newly purchased young bulls should not be multiple joined with older herd bulls. They will not be allowed to work much and in keeping them away from the cows, the older, dominant bull will knock them around.

Use new bulls in either single sire groups or with other young bulls their own age. If a number of young bulls are to be used together, run them together for a few weeks before joining starts. They sort out their pecking order quickly and have fewer problems later.

The Australian Association of Cattle Veterinarians (AACV) defines a normal, fertile bull as “expected to get 90% of 50 normal, cycling, disease free females pregnant within 9 weeks, and 60% of these should become pregnant in the first three weeks of joining”. This expectation would apply to 2 year old bulls, but not to younger bulls.

During Mating:

Check bulls at least twice each week. Watch them work if possible and pay particular attention to any sign of abnormal serving problems like “corkscrew penis” or too many cows returning to heat.

Have a spare bull or bulls available to replace any that break down. If you have to replace a bull, get the bull checked by your vet. Sometimes prompt treatment for small problems can avoid culling. Vendors that provide guarantees on their bulls will usually require a veterinary certificate indicating the problem with unsatisfactory bulls.

Rotate bulls in single sire groups to make sure that any bull infertility is covered. Single sire joining works well but it has risks. The bulls must be checked regularly and carefully or the bulls rotated every one or two cycles.

Attention Buyer

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

Parent Verification Suffixes

The animals listed within this catalogue including its pedigree, are displaying a Parent Verification Suffix which indicates the DNA parent verification status that has been conducted on the animal. The Parent Verification Suffixes that will appear at the end of each animal's name.

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV : both parents have been verified by DNA.

SV : the sire has been verified by DNA.

DV : the dam has been verified by DNA.

# : DNA verification has not been conducted.

E : DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

Privacy Information

In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by Angus Australia in certain circumstances. If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must complete the form included below and forward it to Angus Australia. If the form is not completed, the buyer will be taken to have consented to the disclosure of such information.

BUYERS OPTION TO OPT OUT OF DISCLOSING PERSONAL INFORMATION TO ANGUS AUSTRALIA

If you do not complete this form, you will be taken to have consented to Angus Australia using your name, address and phone number for the purposes of effecting a change of registration of the animal(s) that you have purchased, maintaining its database and disclosing that information to its members on its website.

I, the buyer of animals with the following idents.....

from member.....(name) do not consent to Angus Australia using my name, address and phone number for the purposes of effecting a change of registration of the animals I have mentioned above that I have purchased, maintaining its database and disclosing that information to its members on its website.

Name: ..... Signature: .....

Date: .....

Please forward this completed consent form to Angus Australia, 86 Glen Innes Road, Armidale NSW 2350.

If you have any questions or queries regarding any of the above, please contact Angus Australia on (02) 6773 4600 or email [office@angusaustralia.com.au](mailto:office@angusaustralia.com.au)

Insurance Brokers

## FARM INSURANCE

Protect your farm business and your assets with an insurance policy tailored to meet your needs.

**Breakwater Insurance** can arrange competitive premiums and cover for commercial dairy, beef, sheep and cropping enterprises.

We offer professional, on-farm advice relating to:

- Livestock mortality
- Farm buildings and contents
- Home and contents
- Farm machinery and machinery breakdowns
- Livestock, hay, fencing and farm trees
- Liability
- Motor vehicles (all types)
- Theft
- Business interruption.

## NATIONAL CATTLE HEALTH DECLARATION

V: 02/05/18

Property Identification Code (PIC) of this property  
This MUST be the PIC of the property that  
the stock is being moved from

3	M	Y	N	L	0	4	3
---	---	---	---	---	---	---	---

Attached to accompanying NVD/Waybill No.

--	--	--	--	--	--	--	--

### Biosecurity and health information

1. Has the owner stated above owned all the cattle in this consignment since birth? Y ☒ N ☐

2. Does the property of origin have a completed on-farm biosecurity plan? Y ☒ N ☐

3a. Have these cattle been tested for the presence of pestivirus antigen?  
If tested, were any cattle found to be persistently infected? Y ☒ N ☐  
Y ☒ N ☐

3b. Have these cattle been tested for the presence of pestivirus antibody?  
If tested what percentage of the tested cattle were antibody positive? Y ☒ N ☐  
Y ☒ N ☐

4. Has the property of origin had an occurrence of clinical John's disease (JD) in any species in the past five years? Y ☐ N ☒ Unsure ☐  
J-BAS of Eight (Optional)

5. On the property of origin, have cattle been co-grazed with dairy cattle?  
*See explanatory note for advice on co-grazing with non-bovine species* Y ☐ N ☒ Unsure ☐

6. Has the source herd had a JD test? Y ☒ N ☐ Pending ☐  
If so, which test? Check Test ☒ Sample Test ☐ Date 26 / 6 / 18  
Was the result negative? Y ☒ N ☐

7. If dairy cattle, the consignment has a Dairy Assurance Score of: Part A (herd base score) Part B (calf credits) Part C (total Dairy Score)

8. Any other relevant health information

### Treatments

Treatment type	Product	Date of treatment within last 6 months
Drench or pour-on	Dectomax	July 2022
Liver fluke		
Other treatments	AD&E, multimin & 7in1	July 2022
	Vibriovax, Pestiguard	August 2022

### Current vaccinations for the cattle being moved (see explanatory note)

Clostridial (e.g. 5 in 1):	Y <input type="checkbox"/>	Botulism:	Y <input type="checkbox"/>
Leptospira (e.g. 7 in 1):	Y <input checked="" type="checkbox"/>	Bovine ephemeral fever:	Y <input type="checkbox"/>
Pestivirus:	Y <input checked="" type="checkbox"/>	Tick fever:	Y <input type="checkbox"/>
JD (Silirum):	Y <input type="checkbox"/>	Vibrio:	Y <input checked="" type="checkbox"/>

Other vaccinations (specify):
