SALE INFORMATION

STARTING TIME: 2.30 pm

VENUE:

This Bull Sale will be held at Banquet, 184 Steeles Lane, Mortlake, Victoria.

INSPECTION:

We encourage buyers to inspect the bulls prior to Sale Day. It allows us to assist you select the sire best suited to your needs. Phone us on 0419 884 839 to make an appointment.

Lots catalogued are available for prior Sale Day inspection at our Bull Walk Day from 1.00pm on Thursday 16th February.

Sale day inspection from 11.00am.

CATERING:

Light lunch will be available and refreshments after the Sale.

FREE DELIVERY:

Banquet offers free delivery to the buyer's nearest town on route to Adelaide, SA and Emerald, QLD and to the property within Vic.

BULL TESTING:

All bulls have passed a comprehensive fertility test conducted by Dr. Craig Wood and Dr. Libby Summerell of Terang Mortlake Veterinary Clinic including – examination for structural soundness, examination of reproductive organs, measurement of scrotal circumference. They were also checked for semen motility and morphology.

Semen Motility

Sperm cells need to be motile. At about 60um long, they've a way to travel to get the job done. Following collection of a semen sample, a drop is placed on a microscope slide and examined, 'crush side', to assess the percentage of sperm cells moving forward.

Semen Morphology

Morphology is the anatomy or structure of the sperm. It cannot be tested 'crush side' requiring a large specialised laboratory microscope to examine a preserved semen sample, assessing the % normal and % abnormal sperm cells. It can pick up defects in the sperm that 'crush side' testing cannot. The most serious of these defects can see the sperm start to fertilise an egg but fail to result in a viable embryo and the female will fail to fall in calf. Note that Semen Morphology can differ in subsequent samples from the same bull. Stress can cause this and putting a bull through a sale will generally cause some stress.

SEMEN RETAINED:

Banquet will retain semen from some of the bulls in this Sale for within herd use only. These bulls will be nominated on the supplementary sheet.

THE BANQUET BULL GUARANTEE:

All bulls are backed by a 3 YEAR GUARANTEE. In the event of a bull proven to be incapable of natural service the vendor can either offer a suitable replacement if available or issue a credit for future sales. The credit is a pro-rata value of the bull minus the salvage value. The guarantee can only apply if the bulls' incapacity is not caused by injury or disease since taking delivery. Any claim must be accompanied by a relevant veterinary certificate. The vendor retains the right to obtain independent veterinary confirmation of any claim.

It is important to understand that normal care must be taken, and good husbandry practices observed, as we cannot replace a bull that is injured or dies for any reason. As such, we recommend you insure animals against injury. A representative of an insurance service organisation will be available on Sale Day.

SALE INFORMATION

NATIONAL CATTLE HEALTH STATEMENT:

Banquet has its own Biosecurity Plan prepared in conjunction with our local vet Dr Craig Wood.

We are a J-BAS 6 herd.

See page 87 for our National Cattle Health Declaration.

STOCK HEALTH:

All bulls have been ear notched tested negative for Pestivirus. They have also been vaccinated with Pestiguard vaccine (pestivirus), Vibriovax (vibriosis), 7 in 1 Vaccine (leptospirosis) and drenched with Dectomax. Any animals purchased for Queensland will be vaccinated against 3 day sickness and receive the 3 germ tick vaccine upon request.

RECESSIVE GENETIC CONDITIONS (see page 82)

All animals in this Sale are free of AM, NH, CA and DD by parentage, or have been tested free.

NO CARRIER ANIMALS ARE BEING OFFERED FOR SALE

REBATE TO OUTSIDE AGENTS:

Outside agents accompanying a purchaser to the Sale are entitled to a 5% rebate.

Please refer to page 4 for further detail.

AFTER SALE SERVICE:

Banquet is renowned for excellence in providing after Sales service.

If in doubt, speak with us or with any one of our many satisfied clients.

FURTHER INFORMATION:

Contact Stephen or Noeleen Branson by phoning 0419 884 839 or 0437 029 992
or Email banquetangus@westvic.com.au

OUTSIDE AGENT COMMISSION REBATES

5% rebate will be paid to all agents that attend and who purchase with or on behalf of their clients and settle within seven days of sale date.

2% rebate will be paid to all agents introducing clients that purchase but not accompanied by them to the sale. A written introduction must be received by the vendor 48 hours prior to the sale and accounts must be settled within 7 days of the sale date.

SIGHT UNSEEN PURCHASING PROGRAM

100% satisfaction guarantee.

Available to buyers who cannot attend the Sale.

For those purchasers who have discussed their requirements with us prior to the Sale we offer a 100% money back guarantee if the purchaser is not completely satisfied with their purchase. We must be notified within seven days of taking delivery. However the purchaser will be responsible for return transport costs.

WELCOME

In last year's catalogue I wrote about the amazing times for Agriculture in 2020 and 2021. Well, 2022 saw yet another lift in commodity prices and even greater profits. Currently we are experiencing a softening of the cattle market. Prices have eased back to January 2021 levels. Those same levels that we couldn't believe we were receiving. Rob McCrabb, a now retired Landmark Agent, once said to me "I am always amazed how quickly producers grow accustomed to improved returns". 2023 is showing just how true this statement is!

I am excited that we are returning to times when, better means more. Better managed livestock with better genetics and better presented to the marketplace results in better returns. No longer are poorly bred, light weight calves returning more cents per kilogram. It is exciting to see our hard working and passionate clients receiving excellent returns. Banquet sired heifers achieved top prices at Mortlake in November and January Sales. At Yea, Euroa and Casterton in January. Congratulations to all our clients for their successes in the past year.

We wish everyone Health, Happiness and success for this New Year.

Embrace the challenge, care for each other and celebrate the achievements.

The Banquet Bunch is continuing to grow with Ellie Mae Meulendyks joining the bunch on 30th May 2022. If Noeleen and I had eight kids we would have to print a Family lift out.

SADLY MISSED

During life's journey we have people that touch our lives. Some inspire or comfort or give leadership and support. During 2023 two very important Gentleman passed.

Both had and will continue to have a huge influence on our Family.

We miss them dearly but remember their teachings.

May they rest in peace their work on earth well done.

VALE - LEO MATTHEWS

Poem written by Leo's Son in Law, Collin Van Uden

THE OLD HAND

The old hand coarsened early
Young skin tanned by sun
And hard work well rewarded
But now the old hand's work is done

The old hand coarsened early
Young skin tanned by sun
And hard work well rewarded
But now the old hand's work is done

No more fingers raised to passers-by
On a paddock-saddled road
The old hand has no wheel to turn
No ute-tray to unload

The old hand, stained with rich brown earth
With lessons wisely learned
Over years of bumper crops, and droughts
To the earth the old hand returns

VALE - KEVIN NORRIS

Kevin was one of the greatest Auctioneers of the modern era.

He was an entertainer, an educator and a friend to vendors, purchasers and spectators. To us he was Family.

140 COMMERCIAL ANGUS HEIFERS

RISING TWO YEARS - PTIC

Sourced from leading Banquet Clients

Ryan Pastoral, Winninburn, Camp Creek, Jindabelluc, and Correlup

Joined to Banquet proven calving ease sires from 12th June 2022

Due to commence calving mid-March for 6 weeks.

All drenched and vaccinated with

Dectomax, Multimin, AD+E, 7 in 1 and Pestiguard. Heifers JBAS 6

To be offered in Lots of 10 to 15 prior to the Bull Sale and on Auctions Plus.

BANQUET FEATURE SIRES

TRIO QANTAS Q78

GAR Prophet (USA)
Sire: **BALDRIDGE BEAST MODE B074**
Baldrige Isabel Y69

Trio Docklands H1
DAM: **TRIO BURNETTE L78**
Trio Burnette E17

Qantas Q78 was purchased at the 2020 Trio Sale for the Sale topping \$17,000. Although only a yearling, Q78 showed the neck extension, shoulder refinement and mobility we appreciate. His sire, Beast Mode, has added the extra width of loin, width and depth of hindquarter. His skin and hair type are attributes we seek. At this early stage, we are excited with the performance and consistency of his calves. They show the attributes we chose Qantas for. We used Qantas very heavily in that first season and he has shown the ability to recover strongly. Another great positive! DNA testing has revealed that Qantas is a Red Gene Carrier. We have tested all the sons in this Sale and have clearly identified those that carry the Red Gene. We will continue to use Qantas at Banquet.

Sitz Ellunas Elite 3308 (USA)

BT Right Time 24J
DAM: **VERMONT DREAM E096**
Vermont Dream Y301

At the Dispersal of Vermont Angus in 2010 we admired the 10-month-old Dream E096. She sold for \$38,000 to Merridale and Crawford Studs. We followed her progeny closely and selected Gaffa G4 to join our sire team. Gaffa is owned by Dunoon Angus and has been used widely in that herd. Gaffa adds length of body and extension of neck to his progeny while maintaining the traditional depth and thickness of the Banquet beast. His calving ease has proven to be excellent out of maiden heifers at Banquet. The first group of sons at Banquet created great interest with Quarter Pounder Q252 setting a new stud record of \$60,000. He was selected by Millah Murrah, Alpine and Keringa Studs with ABS Aust. Many Gaffa sons in this Sale were from maiden heifers and offer great calving ease options.

Sire: **BANQUET JAMBEROO J507**
Forres Wilcoola D107

Millah Murrah Doc F159
DAM: **BANQUET YENDI K224**
Banquet Yendi D351

It is the consistency of the progeny of Nuttella N462 that has us so excited. Bulls that produce consistent lines of progeny are so much more valuable. And N462 consistently improves so many traits. He adds thickness, depth and do ability to his progeny. He improves structure and temperament. N462 sons achieved top price at our Autumn Sale at \$62,000 to Glenloch and Quarterway Angus, TAS and second top price of \$60,000 to Moorunga Stud. In our Spring 2022 Sale his son topped the Sale at \$65,000 to Mountain Valley Angus, NSW.

Banquet Dream A250

Banquet Abode A005
DAM: **FORRES WILCOOLA D107**
Lochton Y004

Jamberoo J507 has been prolific and predictable. He has produced 170 progeny at Banquet. And we still revisit him when we need his special skill set. We have used four sons to date. Nuttella N462 is his most famous. 7 sons of N462 have averaged \$41,000. Another son, Priviledge P357, topped our 2020 Sale to Toora West. We have AI'd with him last year. Qomplete Q399 and Qomplex Q406 are flush brothers from our 2021 Sale. We sold Q399 for a valuation of \$48,000. Early calves from both bulls are very encouraging. Jamberoo J507 is a son of the great old Duncan D412 sire. J507's dam was Noleen's pick at the Forres Dispersal. We used another son of D107. Hudson H411.

Musgrave Big Sky (USA)
Sire: **WATTLETOP MOONSHINE M42**
Wattletop Dandloo K48

Banquet Jamberoo J507
DAM: **BANQUET YENDI N453**
Banquet Yendi K245

Quiver Q211 is one of the Moonshine M42 sons we retained from our 2019 drop. His sire, Moonshine M42 was purchased with Quarterway Angus, Tas. He is breeding exceptional daughters for their superb udders, sound structure and are fantastic workers. A son sold in Autumn 2020 for \$21,000, Autumn 2021 for \$23,000, Spring 2021 for \$28,000 and autumn 2022 for \$40,000. Dam of Q211, Yendi N453, is a full sister in blood to Nuttella N462. They are both by J507 and their dams are full sisters. K245 has produced 5 calves in 5 years, including R398 who sold for \$28,000.

BANQUET QAISER Q216

TC Franklin 619 (USA)
Sire: **WATTLETOP FRANKLIN G188**
Wattletop Bsrurah E295

Banquet Jhett J426
DAM: **BANQUET SARAH N428**
Banquet Sarah K228

Qaiser Q216 is a very powerful young sire. Strong head, wide topped and big butted. His progeny carry these traits. Indeed the heads on his sons are exceptional. His dam, N428, is proving an excellent bull breeder. Q216 is her first calf. Her second, a bull, made our 2022 sale and her third, S322, is lot 17 in this sale. We would like some daughters though. Q216 has had calves born from maiden heifers without assistance. His sire, Franklin G188, is a well known calving ease sire. Maternal Grandsire of Q216, Jhett J426, was used at Banquet for many years over maiden heifers with great success.

Lot 75 S394, is a son of Q216

BANQUET QANGA Q238

Musgrave Big Sky (USA)
Sire: **WATTLETOP MOONSHINE M42**
Wattletop Dandloo K48

Banquet Harman H261
DAM: **BANQUET CHAMPAGNE N238**
Banquet Champagne C154

Qanga Q238 was selected in our top three bulls of his drop and was retained for stud use. His sire, Moonshine M42 was purchased with Quarterway Angus, Tas. He is breeding exceptional daughters for their superb udders, sound structure and are fantastic workers. A son sold in Autumn 2020 for \$21,000, Autumn 2021 for \$23,000, Spring 2021 for \$28,000 and autumn 2022 for \$40,000. A full sister to Q238, R222, sold at our 2022 autumn sale as the pick of the pair for \$22,000. Both his other sisters have been retained. N238, dam of Q238, is a sound maternal and hard working cow. She joined our donor group in Spring 2021. Her dam, F338, produced 10 calves in 10 years. Great granddam C154, topped the Belles of Banquet Female Sale at \$30,000 to Bannaby Angus. Q238 is the ultimate calving ease shape. His calves from maidens were born unassisted long and fine fronted. Unlike most calving ease bulls he is exceptional through his hip to pin. His daughters should have excellent maternal traits just like his sire and dam produce.

Sire: **BANQUET MAJOR M004**
Banquet Kite E442

S Chisum 6175
DAM: **BANQUET WIVEM G243**
Banquet WivemE221

We selected to use Quote Q123 before he was sold in our Autumn 2021 Sale for \$24,000, for his balance, structural correctness and doing ability. His depth of body, thickness and great hindquarter also appealed. Of course to get from being admired to being used means he must have a strong pedigree. His dam, Wivem G243, was exceptional. She produced sons selling to \$20,000 and \$16,000. Another son features as Lot 1 in this catalogue. Sire of Q123, Major M004, sold in our Autumn 2017 Sale at 12 months old for \$12,000. M004, is from the special donor Kite E442. E442 is a sixth generation donor cow. Her dam line is A197, T59, P43, L88 and Tulagi Kite E14.

VONG243 BANQUET WIVEM G243^{SV}

BANQUET WIVEM E221[#]

This is the third year we have offered sons of the highly proven old sire, Gaffa G4. We selected G4 for use at Banquet on the strength of his magnificent dam, Dream E096. Like all good sires Gaffa has been replaced at Banquet by a son. In this case it is the \$60,000 Quarter Pounder Q252 who was purchased by Millah Murrah, Alpine and Keringa Studs along with ABS. This son, S007 shows the strength of head, length of body and muscularity that has attracted clients to Gaffa sons. The now deceased donor of S007 was a magnificent cow. Her five sons sold to \$24,000 and averaged \$16,500. Sadly only two daughters and they are both retained.

Many of you may recall the magnificent National N278 who dominated our 2019 Sale. His amazing sale day weight was 975kg at 19 months. After spirited bidding by our clients Toora West prevailed and took him home for \$48,000. He is still in service there. S002 has all the balance of his sire. He is deep bodied, cleaned skinned and easy doing. Appreciate the length and width of his hindquarter. As in Lot 1, S002 is the son of a magnificent old donor. G263 is line bred to the exceptional Dream Family. She has 6 daughters retained. A grandson is Lot 4.

S043 is the first of many outstanding N462 sons in this Sale. S043 has the largest frame of this sire group and is the first choice for those wishing to breed steers that will grow into heavy bullocks and heifers that will become long, maternal and productive cows. With this extra frame S043 retains the traits that have made his sire so popular. He is long and fine shouldered with a strong spine, easy doing and very docile. L186, grand sire of S043, sold to Gilmandyke Stud.

S083 is a stunning individual. All meat, depth and thickness. Strong headed and easy doing. Dam has produced eight calves in eight years. S083 sustained an injury to the outside claw of his near side front foot. He chipped a piece of claw off, probably on a rock. The damage has almost grown out. There is no lameness but we had our vet check for infection and there is no sign. He expects the claw to fully recover, of course we guarantee him. Be assured the damage is environmental not genetic. Should be suitable for joining maiden heifers.

VERMONT DREAM Y301^{PV}

When Ascot Hallmark H147 dominated our 2019 Sales I cheekily suggested the best was yet to come. It was this combination that I was thinking of. Hallmark offers extra frame and length and weight. Combine this with all the depth of body, softness and maternal power of Dream G489 and S289 may be special. S289 has the powerful head and capacity we expected. He is an easy care type of bull with extra softness and ideal hair and skin. For a number of years we referred to G489 as our most valuable donor. She may now be challenged by her half sister. We have sold 18 sons to \$48,000, retained 3 and used another three. Full brothers at Lots 34 and 52.

SILVERADO S235 IS AN OUTSTANDING YOUNG SIRE PROSPECT.
 He combines an exceptional pedigree and phenotype.

He has a power head and strong jaw. He is thick and deep with tremendous muscularity. All this power is covered by a sleek skin. Very sound in his feet, legs and mobility. Full brother at Lot 15 and half-brother at Lot 16. Sire of Silverado S235, Jamberoo J507, has been prolific and predictable. He has produced 170 progeny at Banquet. And we still revisit him, when we need his special skill set. Emblynette P177, dam of Silverado S235, and her dam E199 were purchased at the Anvil Dispersal with Bannaby Stud. The first son of P177 sold in February 2022 for \$40,000 and is being used heavily at Banquet.

Offering Silverado S235 with 100% possession and semen interest. Semen retained by Banquet for in herd use. We are keen to have access to S235 for natural service. We offer to repurchase a one-half share of S235. Possession and semen marketing would be shared equally between the successful bidder and Banquet. To discuss this offer, speak to Noeleen on 0437 029 992 or Stephen on 0419 884 839.

S157 is the third son of P177 in this Sale. This time by the sire sensation Nuttella N462. Prior to this Sale the seven sons of N462 offered have averaged \$41,000. As an individual S157 is outstanding. Admire his power, bone and ruggedness. Plus the usual traits of docility, muscularity and doing ability we see in our N462 progeny. We have retained a flush brother to S157.

Sufficient S231 is a longer, larger framed and fine shouldered son of Jamberoo J507. S231 is smooth bodied and maternal while still displaying adequate muscle expression. His sire J507 has bred extremely well at Banquet, we have used ten sons in the herd and his daughters are magnificent. Sufficient's dam, H492 came from the great Quiet cow family. H492 was a fantastic long, clean fronted maternal cow with a lovely udder. S231's maternal half brother Placid P009 sold in 2020 for \$22,000 to Fernleigh Angus, his calves are looking extremely exciting and we have used him heavily in Spring 2022. Another maternal half brother sold in Feb 2022 Sale for \$22,000. We are very excited for Sufficient's future because of his pedigree. We have already used him in embryo transfer programs in Spring 2022. Semen Retained.

Lot 21

If you wish to add extra muscularity, thickness and fine skins to your calves, then Speciality S323 and Specialist S353 should be on your list. They also feature for their structure and docility.

Their sire Nixon N099, sold in our Spring 2018 Sale for \$32,000. Like his sons he excelled for thickness and muscularity. Nixon has had sons sell for \$30,000 in our Autumn 2021 Sale to Merlewood Angus and for \$28,000 in our Autumn 2022 Sale to a commercial client. Nixon's half-brother topped our Autumn 2018 Sale at \$35,000. N099's Dam Kite J463, has been a fantastic donor at Banquet and featured in our Autumn 2022 Sale selling to Moorunga Angus for \$28,000. The dam of Lots 20 & 21, Quiet Y091, has been a super star at Banquet, providing extreme docility and longevity. She holds the highest docility EBV in the Angus Breed in Australia. Y091 lived until she was nearly 18 years old and was still extremely sound until the day she died. She has bred extremely well having seven daughters and numerous granddaughters already joining the donor team. In our 2021 and 2022 Autumn Sales she had four sons featured, they topped at \$30,000 to K5X Angus, QLD and averaged \$28,500. One son was retained for stud use before being sold to a client in desperate need of a top bull, another seven sons have had semen retained. Half-brothers to lots 6, 23 and 67.

This is unfortunately the last sale Quiet Y091 sons will be offered. So don't miss your chance!
We are very excited for the future of Speciality S323 and Specialist S353.

We have already used S323 in AI over Stud Heifers and S353 in AI over Stud cows.
Semen Retained from both lots. S323, should be suitable for joining maiden heifers.

Banquet Sensation S005 -
Flush Brother to Lots 6, 23 & 67 and Half Brother to Lots 20 & 21

Banquet Quiet Y091 -

SUITABLE FOR JOINING MAIDEN HEIFERS

Lot 27 to Lot 44 have been selected on:

Type – long necks, fine shouldered and moderate bone.

Pedigree – They are sired by proven calving ease sires that have been used by Banquet.

Birth Weight – All these bulls are in the low to moderate actual birth weight range.

EBV – EBV’s of these lots are in the low to moderate range for birth weight EBV.

Remember – Management of the heifers has the greatest impact on calving difficulties.

These sons of Q216 are certainly robust. Admire the width of top, depth, thickness and muscularity of S267. The dam line of S267 is quickly gaining recognition at Banquet. Grand dam of S267, Emblynette E199, was purchased at the Anvil Dispersal with Bannaby Stud. She only produced five calves at Banquet, a son sold for \$21,000 and all four daughters are retained. E199 also has two grand sons retained. For more information on this family see Lot 11. Should be suitable for joining maiden heifers.

S318 has power stamped all over him. He has tremendous volume, extra length, thickness and depth. We often comment about the strength of head and jaw on our bulls. Well our lifetime of breeding livestock has taught us that a weak head, fine jaw and muzzle, small ears leads to frail stock with neither frame, muscle or doing ability. S318 is none of these. K248, dam of S318, also produced P430 who was used at Banquet and Fernleigh and produced several top sons.

BANQUET QUIET A172^{PV}

In the previous lot I commented on the importance of power. Well S439 is all power and grunt. Powerful head and strong jaw, broad muzzle and sleek skin. And of course very docile, this is one solid machine. Yes he does sound exciting. Then we study his pedigree he is another super Nuttella N462 son. His dam, Quiet H646, is a magnificent big frame, long, powerful cow that can't be missed in the paddock. For a cow of her size and volume she is one of the most easy doing females in the mob and still feeds her calf, I think that is an impressive cow. H646's, sister, mother, grand mother and great grand mother have all been successful donors at Banquet. We are pretty excited for Smartie S439's future. Semen retained.

I looked at our comments on S378. Length, muscularity and great skin. I wondered if he is a Qantas son? Sure is. At Banquet we keep crossing our proven lines to produce bulls that are more sound and more predictable for our clients. Parallel to this we keep experimenting with those lines we believe may add value to Banquet bulls. Sadly sometimes the results are never seen in public. But sometimes we find a rock that demands further polishing. Qantas may prove to be a diamond at Banquet.

SUITABLE FOR JOINING MAIDEN HEIFERS

Lot 86 to Lot 96 have been selected on:

Type – long necks, fine shouldered and moderate bone.

Pedigree – They are sired by proven calving ease sires that have been used by Banquet.

Birth Weight – All these bulls are in the low to moderate actual birth weight range.

EBV – EBV’s of these lots are in the low to moderate range for birth weight EBV.

Remember – Management of the heifers has the greatest impact on calving difficulties.

RED GENE

These last 9 bulls in the Catalogue all carry the gene for Red Coat Colour.

If you use a red gene carrier bull over black cows that do not carry a red gene 100% of the progeny will be black but 50% will carry the red gene.

If you use a red gene carrier bull over black cows that carry a red gene on average 25% of the progeny will be black without a red gene, 50% will be black and carry the red gene and 25% will be red.

If you use a red gene carrier bull over red cows 50% of the progeny will be red and 50% will be black and carry the red gene.

The red gene must be considered like every other trait when selecting bulls for your operation.

Trio Qantas Q78 – Sire of 20 Lots

Lot 99 BANQUET STAN S227^{PV} HBR

Ident: VON21S227 Born: 19/7/2021 Mating Type: AI AMFU,CAFU,DDFU,NHFU,RGC

BALDRIDGE BEAST MODE B074^{PV}

TRIO BURNETTE L78[#]

BANQUET COLLECTIVE C351^{SV}
VONH469 BANQUET DREAM H469^{SV}
BANQUET DREAM F353[#]

In the previous lot I refer to introducing something new to Banquet. Qantas is an example of something new we think could be very special. His shape and dimension is amazing. This first drop of heifers and bulls are exciting. S227 shows the same type as his sire, smooth shouldered, strong spine, long bodied and deep flanked. Red Gene Carrier.

VONP302 BANQUET DREAM P302^{PV}
BANQUET DREAM G489^{DV}

This is an excellent line of Qantas sons. Of course when you give a yearling bull the opportunity with 70 first calving heifers he gets access to some outstanding genetic combinations. P302, dam of S251, is one of those. Sired by the \$52,000 Lukas L200 from the great donor G489. We have already used seven of her sons. S251 shows the strong head and jaw, thickness, muscularity and clean skin we expect from these two individuals. Red Gene Carrier.

BRINGING A NEW BULL HOME

Buying a bull is an investment. This investment should contribute to the genetics and sale income of your herd for many years. If you are to get the most from your new bull, it pays to look after him well, especially in the first season of use. This report discusses management strategies to maximise the productive life of your bulls.

Arrival:

New bull buyers are often concerned about the apparent bad temperament of a bull that seemed quiet enough when purchased. Bulls can become upset and excited in the sale and delivery process. They are subjected to strange yards, different noises, loss of their mates, different people, different handling methods, trucking, unloading, new paddocks and different water and feed. This can upset animals which are normally very quiet.

When the bull arrives home, unload him at the yards into a group of cows or steers. Never jump the bull from the back of a truck into a paddock. Bulls from different origins should be put into separate yards with other cattle, steers or cows, for company.

Provide hay and water, then leave the bull alone until the next day, before giving routine health treatments.

Mating New Bulls:

Newly purchased young bulls should not be multiple joined with older herd bulls. They will not be allowed to work much and in keeping them away from the cows, the older, dominant bull will knock them around.

Use new bulls in either single sire groups or with other young bulls their own age. If a number of young bulls are to be used together, run them together for a few weeks before joining starts. They sort out their pecking order quickly and have fewer problems later.

The Australian Association of Cattle Veterinarians (AACV) defines a normal, fertile bull as “expected to get 90% of 50 normal, cycling, disease free females pregnant within 9 weeks, and 60% of these should become pregnant in the first three weeks of joining”. This expectation would apply to 2 year old bulls, but not to younger bulls.

During Mating:

Check bulls at least twice each week. Watch them work if possible and pay particular attention to any sign of abnormal serving problems like “corkscrew penis” or too many cows returning to heat.

Have a spare bull or bulls available to replace any that break down. If you have to replace a bull, get the bull checked by your vet. Sometimes prompt treatment for small problems can avoid culling. Vendors that provide guarantees on their bulls will usually require a veterinary certificate indicating the problem with unsatisfactory bulls.

Rotate bulls in single sire groups to make sure that any bull infertility is covered. Single sire joining works well but it has risks. The bulls must be checked regularly and carefully or the bulls rotated every one or two cycles.

RECESSIVE GENETIC CONDITIONS

This is information for bull buyers about the recessive genetic conditions, Arthrogryposis Multiplex (AM), Hydrocephalus (NH), Contractural Arachnodactyly (CA) and Developmental Duplications (DD).

Putting undesirable Genetic Recessive Conditions in perspective

All animals, including humans, carry single copies (alleles) of undesirable or "broken" genes. In single copy form, these undesirable alleles usually cause no harm to the individual.

But when animals carry 2 copies of certain undesirable or "broken" alleles it often results in bad consequences. Advances in genomics have facilitated the development of accurate diagnostic tests to enable the identification and management of numerous undesirable or "broken" genes.

Angus Australia is proactive in providing its members and their clients with relevant tools and information to assist them in the management of known undesirable genes and our members are leading the industry in their use of this technology.

What are AM, NH, CA and DD?

AM, NH, CA and DD are all recessive conditions caused by "broken" alleles within the DNA of individual animals. When a calf inherits 2 copies of the AM or NH alleles their development is so adversely affected that they will be still-born.

In other cases, such as CA and DD, calves carrying 2 copies of the broken allele may reach full-term. In such cases the animal may either appear relatively normal, or show physical symptoms that affect their health and/or performance.

How are the conditions inherited?

Research in the U.S. and Australia indicates that AM, NH, CA and DD are simply inherited recessive conditions. This means that a single gene (or pair of alleles) controls the condition.

For this mode of inheritance two copies of the undesirable allele need to be present before the condition is seen; in which case you may get an abnormal calf. A more common example of a trait with a simple recessive pattern of inheritance is black and red coat colour.

Animals with only one copy of the undesirable allele (and one copy of the normal form of the allele) appear normal and are known as "carriers".

What happens when carriers are mated to other animals?

Carriers, will on average, pass the undesirable allele to a random half (50 %) of their progeny.

When a carrier bull and carrier cow is mated, there is a 25% chance that the resultant calf will inherit two normal alleles, a 50% chance that the mating will result in a carrier (i.e. with just 1 copy of the undesirable allele, and a 25% chance that the calf will inherit two copies of the undesirable gene.

If animals tested free of the undesirable gene are mated to carrier animals the condition will not be expressed at all. All calves will appear normal, but approximately half (50%) could be expected to be carriers.

How is the genetic status of animals reported?

DNA-based diagnostic tests have been developed which can be used to determine whether an individual animal is either a carrier or free of the alleles resulting in AM, NH, CA or DD.

Angus Australia uses advanced software to calculate the probability of (untested) animals to being carriers of AM, NH, CA or DD. The software uses the test results of any relatives in the calculations and the probabilities may change as new results for additional animals become available.

The genetic status of animals is being reported using five categories:

AMF	Tested AM free
AMFU	Based on Pedigree AM free - Animal has not been tested
AM_%	_% probability the animal is an AM carrier
AMC	Tested AM-Carrier
AMA	AM-Affected

For NH, CA and DD, simply replace AM in the above table with NH, CA or DD.

Registration certificates and the Angus Australia web-database display these codes. This information is displayed on the animal details page and can be accessed by conducting an "Database Search" from the Angus Australia website or looking up individual animals listed in a sale catalogue.

Implications for Commercial Producers

Your decision on the importance of the genetic condition status of replacement bulls should depend on the genetics of your cow herd (which bulls you previously used) and whether some female progeny will be retained or sold as breeders.

Most Angus breeders are proactive and transparent in managing known genetic conditions, endeavouring to provide the best information available. The greatest risk to the commercial sector from undesirable genetic recessive conditions comes from unregistered bulls with unknown genetic background. The genetic condition testing that Angus Australia seedstock producers are investing in provides buyers of registered Angus bulls with unmatched quality assurance.

For further information contact Angus Australia's Breed Development & Extension Manager on (02) 6773 4618.

DISCLAIMER AND PRIVACY INFORMATION

Attention Buyer

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

Parent Verification Suffixes

The animals listed within this catalogue including its pedigree, are displaying a Parent Verification Suffix which indicates the DNA parent verification status that has been conducted on the animal. The Parent Verification Suffixes that will appear at the end of each animal's name.

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV : both parents have been verified by DNA.

SV : the sire has been verified by DNA.

DV : the dam has been verified by DNA.

: DNA verification has not been conducted.

E : DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

Privacy Information

In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by Angus Australia in certain circumstances. If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must complete the form included below and forward it to Angus Australia. If the form is not completed, the buyer will be taken to have consented to the disclosure of such information.

BUYERS OPTION TO OPT OUT OF DISCLOSING PERSONAL INFORMATION TO ANGUS AUSTRALIA

If you do not complete this form, you will be taken to have consented to Angus Australia using your name, address and phone number for the purposes of effecting a change of registration of the animal(s) that you have purchased, maintaining its database and disclosing that information to its members on its website.

I, the buyer of animals with the following idents.....

from member.....(name) do not consent to Angus Australia using my name, address and phone number for the purposes of effecting a change of registration of the animals I have mentioned above that I have purchased, maintaining its database and disclosing that information to its members on its website.

Name: Signature:

Date:

Please forward this completed consent form to Angus Australia, 86 Glen Innes Road, Armidale NSW 2350.

If you have any questions or queries regarding any of the above, please contact Angus Australia on (02) 6773 4600 or email office@angusaustralia.com.au

Insurance Brokers

FARM INSURANCE

Protect your farm business and your assets with an insurance policy tailored to meet your needs.

Breakwater Insurance can arrange competitive premiums and cover for commercial dairy, beef, sheep and cropping enterprises.

We offer professional, on-farm advice relating to:

- Livestock mortality
- Farm buildings and contents
- Home and contents
- Farm machinery and machinery breakdowns
- Livestock, hay, fencing and farm trees
- Liability
- Motor vehicles (all types)
- Theft
- Business interruption.

Biosecurity and health information

- Has the owner stated above owned all the cattle in this consignment since birth?
Y ☒ N ☐
- Does the property of origin have a completed on-farm biosecurity plan?
Y ☒ N ☐
- Have these cattle been tested for the presence of pestivirus antigen?
If tested, were any cattle found to be persistently infected?
Y ☒ N ☐
Y ☐ N ☒
Y ☐ N ☒
- Have these cattle been tested for the presence of pestivirus antibody?
If tested what percentage of the tested cattle were antibody positive?
Y ☐ N ☒
- Has the property of origin had an occurrence of clinical Johne's disease (JD) in any species in the past five years?
Y ☐ N ☒ Unsure ☐
J-BAS of Six (Optional)
- On the property of origin, have cattle been co-grazed with dairy cattle?
See explanatory note for advice on co-grazing with non-bovine species
Y ☐ N ☒ Unsure ☐
- Has the source herd had a JD test?
If so, which test? Y ☒ N ☐ Pending ☐
Check Test ☒ Sample Test ☐ Date 26 / 6 / 18
Was the result negative? Y ☒ N ☐
- If dairy cattle, the consignment has a Dairy Assurance Score of:
Part A (herd base score) Part B (calf credits) Part C (total Dairy Score)
- Any other relevant health information

Treatments

Treatment type	Product	Date of treatment within last 6 months
Drench or pour-on	Dectomax	September 2022
Liver fluke		
Other treatments	AD&E, multimin & 7in1	September 2022
	Vibriovax, Pestiguard	January 2023

Current vaccinations for the cattle being moved (see explanatory note)

Clostridial (e.g. 5 in 1):	Y <input type="checkbox"/>	Botulism:	Y <input type="checkbox"/>
