SALE INFORMATION

STARTING TIME: 11.00 am

VENUE: This Bull Sale will be held at Banquet, 184 Steeles Lane, Mortlake, Victoria.

INSPECTION:

We encourage buyers to inspect the bulls prior to Sale Day.

Presale Inspection Afternoon Thursday 24th August 1pm to 4pm

At 184 Steeles Lane, Mortlake.

Sale day inspection from 9.00am, Friday 1st September.

CATERING: Light lunch will be available.

FREE DELIVERY:

Banquet offers free delivery to the buyer's nearest town on route to Adelaide, SA and Emerald, QLD and to the property within Vic.

BULL TESTING:

All bulls have passed a comprehensive fertility test conducted by Dr. Craig Wood and Dr. Libby Summerell of Terang Mortlake Veterinary Clinic including – examination for structural soundness, examination of reproductive organs, measurement of scrotal circumference. They were also checked for semen motility and morphology.

Semen Motility

Sperm cells need to be motile. At about 60um long, they've a way to travel to get the job done. Following collection of a semen sample, a drop is placed on a microscope slide and examined, 'crush side', to assess the percentage of sperm cells moving forward.

Semen Morphology

Morphology is the anatomy or structure of the sperm. It cannot be tested 'crush side' requiring a large specialised laboratory microscope to examine a preserved semen sample, assessing the % normal and % abnormal sperm cells. It can pick up defects in the sperm that 'crush side' testing cannot. The most serious of these defects can see the sperm start to fertilise an egg but fail to result in a viable embryo and the female will fail to fall in calf. Note that Semen Morphology can differ in subsequent samples from the same bull. Stress can cause this and putting a bull through a sale will generally cause some stress.

SEMEN RETAINED:

Banquet will retain semen from some of the bulls in this Sale for within herd use or progeny testing. These bulls will be nominated on the supplementary sheet.

THE BANQUET BULL GUARANTEE:

All bulls are backed by a 3 YEAR GUARANTEE. In the event of a bull proven to be incapable of natural service the vendor can either offer a suitable replacement if available or issue a credit for future sales. The credit is a pro-rata value of the bull minus the salvage value. The guarantee can only apply if the bulls' incapacity is not caused by injury or disease since taking delivery. Any claim must be accompanied by a relevant veterinary certificate. The vendor retains the right to obtain independent veterinary confirmation of any claim.

It is important to understand that normal care must be taken, and good husbandry practices observed, as we cannot replace a bull that is injured or dies for any reason. As such, we recommend you insure animals against injury. A representative of an insurance service organisation will be available on Sale Day.

SALE INFORMATION

NATIONAL CATTLE HEALTH STATEMENT:

Banquet has its own Biosecurity Plan prepared in conjunction with our local vet Dr Craig Wood. We are a J-BAS 6 herd.

See page 37 for our National Cattle Health Declaration.

STOCK HEALTH:

All bulls have been ear notched tested negative for Pestivirus. They have also been vaccinated with Pestiguard vaccine (pestivirus), Vibriovax (vibriosis), 7 in 1 Vaccine (leptospirosis) and drenched with Dectomax. Any bulls purchased for Queensland will be vaccinated against 3 day sickness and receive the 3 germ tick vaccine upon request.

RECESSIVE GENETIC CONDITIONS

All animals in this Sale are free of AM, NH, CA and DD by parentage, or have been tested free.

NO CARRIER ANIMALS ARE BEING OFFERED FOR SALE

REBATE TO OUTSIDE AGENTS:

Outside agents accompanying a purchaser to the Sale are entitled to a 5% rebate. Please refer to page 4 for further detail.

AFTER SALE SERVICE:

Banquet is renowned for excellence in providing after Sales service. If in doubt, speak with us or with any one of our many satisfied clients.

FURTHER INFORMATION:

Contact Stephen or Noeleen Branson

by phoning
or Email

0419 884 839 or 0437 029 992
banquetangus@westvic.com.au

OUTSIDE AGENT COMMISSION REBATES

5% rebate will be paid to all agents that attend and who purchase with or on behalf of their clients and settle within seven days of sale date.

2% rebate will be paid to all agents introducing clients that purchase but not accompanied by them to the sale. A written introduction must be received by the vendor 48 hours prior to the sale and accounts must be settled within 7 days of the sale date.

SIGHT UNSEEN PURCHASING PROGRAM

100% satisfaction guarantee.

Available to buyers who cannot attend the Sale.

For those purchasers who have discussed their requirements with us prior to the Sale we offer a 100% money back guarantee if the purchaser is not completely satisfied with their purchase. We must be notified within seven days of taking delivery. However the purchaser will be responsible for return transport costs.

BANQUET FEATURE SIRES

TRIO QANTAS Q78

GAR Prophet (USA)
Sire: **BALDRIDGE BEAST MODE B074**
Baldrige Isabel Y69

Trio Docklands H1
DAM: **TRIO BURNETTE L78**
Trio Burnette E17

Qantas Q78 was purchased at the 2020 Trio Sale for the Sale topping \$17,000. Although only a yearling, Q78 showed the neck extension, shoulder refinement and mobility we appreciate. His sire, Beast Mode, has added the extra width of loin, width and depth of hindquarter. His skin and hair type are attributes we seek. At this early stage, we are excited with the performance and consistency of his calves. They show the attributes we chose Qantas for. We used Qantas very heavily in that first season and he has shown the ability to recover strongly. Another great positive! Sons of Qantas met with strong demand at our 2023 Autumn Sale. They topped at \$33,000 to Robert Love.

Aberdeen Estate Homer H70
Sire: **BANQUET NIXON N099**
Banquet Kite J463

Ascot Hallmark H147
DAM: **BANQUET IRENE N426**
Banquet Irene A266

Quirky is an amazing Nixon son. He is a powerful headed, strong jawed meat machine. He has massive width of loin, strong spine and exceptional muscle pattern. But with all this meat cover and capacity he moves like a cat. Both Quirky sons in this sale show these traits. Quirky Q209 was purchased by Merlewood Stud for \$30,000.

Sire: **BANQUET JAMBEROO J507**
Forres Wilcoola D107

Millah Murrah Doc F159
DAM: **BANQUET YENDI K224**
Banquet Yendi D351

It is the consistency of the progeny of Nuttella N462 that has us so excited. Bulls that produce consistent lines of progeny are so much more valuable. And N462 consistently improves so many traits. He adds thickness, depth and do ability to his progeny. He improves structure and temperament. N462 sons achieved top price at our Autumn Sale at \$62,000 to Glenloch and Quarterway Angus, TAS and second top price of \$60,000 to Moorunga Stud. In our Spring 2022 Sale his son topped the Sale at \$65,000 to Mountain Valley Angus, NSW.

Sire: **MERRIDALE GAFFA G4**
Vermont Dream E096

Millah Murrah Jupiter J194
DAM: **BANQUET KITE L131**
Banquet Kite J428

When Quarter Pounder Q252 was sold in 2021 for \$60,000 it was the highest price ever achieved at Banquet. The depth of fleshing, muscle pattern and hair type of Quarter Pounder attracted such strong competition. He was purchased by a syndicate of Millah Murrah, Alpine and Keringa Studs with ABS. He has been widely used with positive progeny reports. His first sons are just reaching sale age and his daughters show great promise.

Tabaret T113 and his five half brothers at Lots 2, 3, 4, 5 and 7 are amongst the very best we have offered in our 33 Sales. Nuttella N462 has elevated himself to yet another level with this offering of seven sons. Their consistency of temperament, structure and type is amazing. Tabaret shows the bone, power and grunt of N462. He has a little more length and frame than most, something we really admire. His dam, P52, was purchased at the Ayrvale Dispersal as our pick of the heifers. She shows more power and capacity than most with that data set. We have retained her first son and her four daughters, two are flush sisters to T113. T113 is an exceptional prospect. Semen Retained.

Tango T079 is exceptional for type, structure and temperament. He is powerful headed, strong jawed and wide muzzled. He has a large loin and massive hindquarter. Dam of T079, K006, is the clear standout from our investment at the Coolana Dispersal. She tracks back to the very successful Burnette family at Raff Angus. The quality of her progeny has elevated her to Donor status at Banquet. All her sons to date have made our Sales and sold to \$30,000. K006 has all eight daughters retained and a young full brother to T079 may be retained at Banquet. Semen Retained.

Top Guy T039 is a typical N462 son. Appreciate the strength of his head and jaw, and the length and capacity of his body. A great sire can consistently stamp his attributes on his progeny. Nuttella does that better than any sire we have used. These first five sons from outcross cows are exceptional. T039 and his flush brothers at Lots 4 and 5 are from a very good Ayrvale cow. We selected her for her soundness, structure and capacity. She has already produced 48 progeny with her first son selling for \$19,000.

VONP641 BANQUET QUEST P641[#]

BANQUET QUEST G503^{SV}

T142 shows extra length and capacity of body. He has that strong head that is a trade mark of Banquet. He is sired by the very successful Q211. Unfortunately Q211 passed this year but his progeny and semen stocks will see his influence continue. Dam of T142, P641, traces back to the only introduction of the great Quest family from Atahua Stud in New Zealand. A half brother to P641 sold for \$20,000 to Clive White.

T001 has a powerful head. He also displays extreme muscularity, thickness, softness and doing ability all in the one package, just like his sire, Quirky Q209, when he was purchased by Merlewood Angus for \$30,000 in Autumn 2021 Sale. Dam, Quiet H492, is another fantastic Quiet cow. H492 made the donor team very easily for her exceptional maternal attributes and a pedigree full of famous Banquet cows. H492 has had sons sell for \$22,000 in 2020, \$20,000 in 2022 and \$19,000 in 2023. Two of these sons have been used heavily in the Stud with great success. All six daughters have been retained and two have already joined the donor team.

SUITABLE FOR JOINING MAIDEN HEIFERS

Lot 13 to Lot 29 have been selected on:

Type – long necks, fine shouldered and moderate bone.

Pedigree – They are sired by proven calving ease sires that have been used by Banquet.

Birth Weight – All these bulls are in the low to moderate actual birth weight range.

EBV – EBV’s of these lots are in the low to moderate range for birth weight EBV.

Remember – Management of the heifers has the greatest impact on calving difficulties.

He has developed into a massive sire with exceptional soundness and mobility. He is an exciting prospect. T100 has only two half brothers one selling at \$13,000 the other at \$28,000. **Should be suitable for joining maiden heifers.**

All through our Catalogue I have described the great Dream G489. This is your last chance to add a son to your program. And what a beauty. If you want an earlier maturing sire who will add cover to your calves and replacement females, T009 is for you. With his earlier maturity T009 has retained a refined shoulder that is important for calving ease. **Should be suitable for joining maiden heifers.**

T168 offers an outcross to our many long term clients. But he is much more than just any outcross. Admire his fine shoulder, strong spine and soft skin. His sire, M204, has been well proven through the Angus Sire Benchmarking Program and offers some exceptional data. When he is joined to superior dams with extra fleshing and thickness the results are promising, K006, dam of T168, is one of those donor dams. More notes on her in Lot 2. **Should be suitable for joining maiden heifers.**

T066 is a very attractive package. He is clean fronted and long bodied. He shows strong maternal attributes. What is that you may ask? To me his fine shoulder and long hip to pin, flat bone and fine skin indicates that he will breed superior females. Just like his dam, F493, Granddam W173 and Great Granddam Kiwi Dream M41. They were all donors and produced a total of 271 calves at Banquet. **Should be suitable for joining maiden heifers.**

Tank T034, a very fitting name for both his type and pedigree. He is sired by the legend J507. J507 has sired 175 progeny at Banquet. We have used eight sons. Sons have sold to \$40,000 and \$24,000 for a half share. His most famous son is Nuttella N462. Dam of T034, W164, is also a legend at Banquet when she died sitting up in the paddock at 18 years old, she had produced 50 calves at Banquet. Her top 11 sons averaged \$17,500. A flush brother to T034 sold last Spring Sale for \$26,000.

Buying a bull is an investment. This investment should contribute to the genetics and sale income of your herd for many years. If you are to get the most from your new bull, it pays to look after him well, especially in the first season of use. This report discusses management strategies to maximise the productive life of your bulls.

Arrival:

New bull buyers are often concerned about the apparent bad temperament of a bull that seemed quiet enough when purchased. Bulls can become upset and excited in the sale and delivery process. They are subjected to strange yards, different noises, loss of their mates, different people, different handling methods, trucking, unloading, new paddocks and different water and feed. This can upset animals which are normally very quiet.

When the bull arrives home, unload him at the yards into a group of cows or steers. Never jump the bull from the back of a truck into a paddock. Bulls from different origins should be put into separate yards with other cattle, steers or cows, for company.

Provide hay and water, then leave the bull alone until the next day, before giving routine health treatments.

Mating New Bulls:

Newly purchased young bulls should not be multiple joined with older herd bulls. They will not be allowed to work much and in keeping them away from the cows, the older, dominant bull will knock them around.

Use new bulls in either single sire groups or with other young bulls their own age. If a number of young bulls are to be used together, run them together for a few weeks before joining starts. They sort out their pecking order quickly and have fewer problems later.

The Australian Association of Cattle Veterinarians (AACV) defines a normal, fertile bull as “expected to get 90% of 50 normal, cycling, disease free females pregnant within 9 weeks, and 60% of these should become pregnant in the first three weeks of joining”. This expectation would apply to 2 year old bulls, but not to younger bulls.

During Mating:

Check bulls at least twice each week. Watch them work if possible and pay particular attention to any sign of abnormal serving problems like “corkscrew penis” or too many cows returning to heat.

Have a spare bull or bulls available to replace any that break down. If you have to replace a bull, get the bull checked by your vet. Sometimes prompt treatment for small problems can avoid culling. Vendors that provide guarantees on their bulls will usually require a veterinary certificate indicating the problem with unsatisfactory bulls.

Rotate bulls in single sire groups to make sure that any bull infertility is covered. Single sire joining works well but it has risks. The bulls must be checked regularly and carefully or the bulls rotated every one or two cycles.

Attention Buyer

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

Parent Verification Suffixes

The animals listed within this catalogue including its pedigree, are displaying a Parent Verification Suffix which indicates the DNA parent verification status that has been conducted on the animal. The Parent Verification Suffixes that will appear at the end of each animal's name.

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV : both parents have been verified by DNA.

SV : the sire has been verified by DNA.

DV : the dam has been verified by DNA.

: DNA verification has not been conducted.

E : DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

Privacy Information

In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by Angus Australia in certain circumstances. If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must complete the form included below and forward it to Angus Australia. If the form is not completed, the buyer will be taken to have consented to the disclosure of such information.

BUYERS OPTION TO OPT OUT OF DISCLOSING PERSONAL INFORMATION TO ANGUS AUSTRALIA

If you do not complete this form, you will be taken to have consented to Angus Australia using your name, address and phone number for the purposes of effecting a change of registration of the animal(s) that you have purchased, maintaining its database and disclosing that information to its members on its website.

I, the buyer of animals with the following idents.....

from member.....(name) do not consent to Angus Australia using my name, address and phone number for the purposes of effecting a change of registration of the animals I have mentioned above that I have purchased, maintaining its database and disclosing that information to its members on its website.

Name: Signature:

Date:

Please forward this completed consent form to Angus Australia, 86 Glen Innes Road, Armidale NSW 2350.

If you have any questions or queries regarding any of the above, please contact Angus Australia on (02) 6773 4600 or email office@angusaustralia.com.au

Breakwater

Insurance Brokers

FARM INSURANCE

Protect your farm business and your assets with an insurance policy tailored to meet your needs.

Breakwater Insurance can arrange competitive premiums and cover for commercial dairy, beef, sheep and cropping enterprises.

We offer professional, on-farm advice relating to:

- Livestock mortality
- Farm buildings and contents
- Home and contents
- Farm machinery and machinery breakdowns
- Livestock, hay, fencing and farm trees
- Liability
- Motor vehicles (all types)
- Theft
- Business interruption.

NATIONAL CATTLE HEALTH DECLARATION

V: 02/05/18

Property Identification Code (PIC) of this property
This MUST be the PIC of the property that
the stock is being moved from

3 M Y N L O 4 3

Attached to accompanying NVD/Waybill No.

Biosecurity and health information

1. Has the owner stated above owned all the cattle in this consignment since birth? Y ☒ N ☐

2. Does the property of origin have a completed on-farm biosecurity plan? Y ☒ N ☐

3a. Have these cattle been tested for the presence of pestivirus antigen?
If tested, were any cattle found to be persistently infected? Y ☒ N ☐
Y ☐ N ☒

3b. Have these cattle been tested for the presence of pestivirus antibody?
If tested what percentage of the tested cattle were antibody positive? Y ☐ N ☒

4. Has the property of origin had an occurrence of clinical John's disease (JD) in any species in the past five years? Y ☐ N ☒ Unsure ☐
J-BAS of Six (Optional)

5. On the property of origin, have cattle been co-grazed with dairy cattle?
See explanatory note for advice on co-grazing with non-bovine species Y ☐ N ☒ Unsure ☐

6. Has the source herd had a JD test? Y ☒ N ☐ Pending ☐
If so, which test? Check Test ☒ Sample Test ☐ Date 26 / 6 / 18
Was the result negative? Y ☒ N ☐

7. If dairy cattle, the consignment has a Dairy Assurance Score of: Part A (herd base score) Part B (half credits) Part C (total Dairy Score)

8. Any other relevant health information

Treatments

Treatment type	Product	Date of treatment within last 6 months
Drench or pour-on	Dectomax	June 2023
Liver fluke		
Other treatments	AD&E	June 2023
	Vibriovax, Pestiguard	July 2023

Current vaccinations for the cattle being moved (see explanatory note)

Clostridial (e.g. 5 in 1):	Y <input type="checkbox"/>	Botulism:	Y <input type="checkbox"/>
Leptospirosis (e.g. 7 in 1):	Y <input checked="" type="checkbox"/>	Bovine ephemeral fever:	Y <input type="checkbox"/>
Pestivirus:	Y <input checked="" type="checkbox"/>	Tick fever:	Y <input type="checkbox"/>
JD (Sillirum):	Y <input type="checkbox"/>	Vibriosis:	Y <input checked="" type="checkbox"/>

Other vaccinations (specify):

Declaration (see explanatory notes for further information)

I, Noeleen Elizabeth Branson
(Full name)

184 Steeles Lane
