SALE INFORMATION

STARTING TIME: 11.00 am

VENUE: This Bull Sale will be held at Banquet, 184 Steeles Lane, Mortlake, Victoria.

INSPECTION:

We encourage buyers to inspect the bulls prior to Sale Day.

Presale Inspection Afternoon

Thursday 28th August 1:00pm to 4:00pm

At 184 Steeles Lane, Mortlake.

Sale day inspection from 9.00am, Friday 5th September.

CATERING: Light lunch will be available.

FREE DELIVERY:

Banquet offers free delivery to the buyer's nearest town on route to Adelaide, SA and Emerald, QLD and to the property within Vic.

BULL TESTING:

All bulls have passed a comprehensive fertility test conducted by Dr. Craig Wood and Dr. Libby Summerell of Terang Mortlake Veterinary Clinic including – examination for structural soundness, examination of reproductive organs, measurement of scrotal circumference. They were also checked for semen motility and morphology.

Semen Motility

Sperm cells need to be motile. At about 60um long, they've a way to travel to get the job done. Following collection of a semen sample, a drop is placed on a microscope slide and examined, 'crush side', to assess the percentage of sperm cells moving forward.

Semen Morphology

Morphology is the anatomy or structure of the sperm. It cannot be tested 'crush side' requiring a large specialised laboratory microscope to examine a preserved semen sample, assessing the % normal and % abnormal sperm cells. It can pick up defects in the sperm that 'crush side' testing cannot. The most serious of these defects can see the sperm start to fertilise an egg but fail to result in a viable embryo and the female will fail to fall in calf. Note that Semen Morphology can differ in subsequent samples from the same bull. Stress can cause this and putting a bull through a sale will generally cause some stress.

SEMEN RETAINED:

Banquet will retain semen from some of the bulls in this Sale for within herd use or progeny testing. These bulls will be nominated on the supplementary sheet.

THE BANQUET BULL GUARANTEE:

All bulls are backed by a 3 YEAR GUARANTEE. In the event of a bull proven to be incapable of natural service the vendor can either offer a suitable replacement if available or issue a credit for future sales. The credit is a pro-rata value of the bull minus the salvage value. The guarantee can only apply if the bulls' incapacity is not caused by injury or disease since taking delivery. Any claim must be accompanied by a relevant veterinary certificate. The vendor retains the right to obtain independent veterinary confirmation of any claim.

It is important to understand that normal care must be taken, and good husbandry practices observed, as we cannot replace a bull that is injured or dies for any reason. As such, we recommend you insure animals against injury. A representative of an insurance service organisation will be available on Sale Day.

SALE INFORMATION

NATIONAL CATTLE HEALTH STATEMENT:

Banquet has its own Biosecurity Plan prepared in conjunction with our local vet Dr Craig Wood. We are a J-BAS 6 herd.

See page 41 for our National Cattle Health Declaration.

STOCK HEALTH:

All bulls have been ear notched tested negative for Pestivirus. They have also been vaccinated with Pestiguard vaccine (pestivirus), Vibriovax (vibriosis), 7 in 1 Vaccine (leptospirosis) and drenched with Dectomax. Any bulls purchased for Queensland will be vaccinated against 3 day sickness and receive the 3 germ tick vaccine upon request.

RECESSIVE GENETIC CONDITIONS

All animals in this Sale are free of AM, NH, CA and DD by parentage, or have been tested free.

NO CARRIER ANIMALS ARE BEING OFFERED FOR SALE

REBATE TO OUTSIDE AGENTS:

Outside agents accompanying a purchaser to the Sale are entitled to a 5% rebate. Please refer to page 4 for further detail.

AFTER SALE SERVICE:

Banquet is renowned for excellence in providing after Sales service. If in doubt, speak with us or with any one of our many satisfied clients.

FURTHER INFORMATION:

Contact Stephen Branson - 0419 884 839
 Noeleen Branson - 0437 029 992
 Hamish Branson - 0427 164 031
Email: banquetangus@westvic.com.au

OUTSIDE AGENT COMMISSION REBATES

5% rebate will be paid to all agents that attend and who purchase with or on behalf of their clients and settle within seven days of sale date.

2% rebate will be paid to all agents introducing clients that purchase but not accompanied by them to the sale. A written introduction must be received by the vendor 48 hours prior to the sale and accounts must be settled within 7 days of the sale date.

SIGHT UNSEEN PURCHASING PROGRAM

100% satisfaction guarantee.

Available to buyers who cannot attend the Sale.

For those purchasers who have discussed their requirements with us prior to the Sale we offer a 100% money back guarantee if the purchaser is not completely satisfied with their purchase. We must be notified within seven days of taking delivery. However the purchaser will be responsible for return transport costs.

BANQUET FEATURE SIRES

BANQUET STATESMAN S154

IDENT: VON21S154

DOB: 27/06/2021

AMF, CAF, DDF, NHF, DWF,
MAF, MHF, OHF, OSF, RGF

Banquet Jamberoo J507
Sire: BANQUET NUTTELLA N462
Banquet Yendi K224

Black Aqua Lucifer L15
DAM: ANVIL EMBLYNETTE P177
Anvil Emblynette E199

Statesman S154, was retained and used at 15 months of age over first calvers. He was selected for his powerful head, strong spine, wide top, big loin, tight sheath, huge hindquarter, lovely docility and a great pedigree. He has stamped all his progeny with all these great traits. His first sons featured in our Autumn 2025 Sale. S154 is breeding very consistent just like his sire, Nuttella N462. We rate N462 as the best sire we have ever used. Now his main sons S005, S154 and S439 are close to his status. Dam of S154, Emblynette P177, was purchased as a calf at foot from the Anvil dispersal. P177's sons have sold to \$40,000 twice and averaging \$33,500. 3 sons will be offered in this Sale.

Wattletop Moonshine M42
DAM: BANQUET IRENE P293
Banquet Irene M279

Sunrise S236, was retained to use over heifers, for his length, thickness and magnificent smooth shoulder. His dam, Irene P293, had already produced a stud sire, Rabble R178. P293 has now joined our E.T programs due to the quality her progeny are producing. We are planning to flush a half sister to S236 this Spring. Sire of S236, Qantas Q78, had an exceptional amount of power and weight for age. Q78's first sons were offered in our Autumn 2023 Bull Sale and sold to \$33,000. S236's first sons featured in our Autumn 2025 Bull Sale. Sunrise has been sold privately this year for \$15,000 to a client in need of a top bull. 5 sons will be offered in this Sale.

Forres Wilcoola D107

Millah Murrah Doc F159
DAM: BANQUET YENDI K224
Banquet Yendi D351

It is the consistency of the progeny of Nuttella that makes him such a super sire. Bulls that produce consistent lines of progeny are so much more valuable. N462 consistently adds thickness, depth and do ability to his progeny. He also improves structure and temperament. We rate Nuttella as the best sire we have used at Banquet. N462 sons achieved top prices at our Autumn 2022 Sale at \$62,000 and \$60,000. In our Spring 2022 Sale a son topped at \$65,000. In our 2023 Spring Sale a son topped at \$42,000. Sons sold to \$40,000 in our Autumn 2024 Sale. Another Nuttella son topped our 2025 Autumn Sale at \$64,000 to Camp Creek. Most recently a Nuttella daughter topped the World Angus Expo Sale at \$134,000 to Ballawinna Angus. A half share in another daughter was sold for \$50,000 to Jones Farms. 10 sons will be offered in this Sale.

Banquet Jamberoo J507
Sire: BANQUET NUTTELLA N462
Banquet Yendi K224

Dylemma Radar W42
DAM: BANQUET QUIET Y091
QV Quiet Q15

Sensation S005 was the star of our Spring 2022 Sale. He made a new record when he sold for \$65,000 to Mountain Valley Angus. He was admired for his magnificent head and jaw, huge top, muscularity and width. Then to add he is sired by the super sire Nuttella N462. S005 shows everything we love about our Nuttella progeny. Dam of S005, Quiet Y091, lived until she was nearly 18 years old and was still super sound until the day she died. Y091 was a sensational breeder with 8 daughters already making it into the donor team. Another son topped our Autumn 2023 Sale at \$55,000. We have retained semen from 7 sons. S005's docility EBV of +68 needs to be admired. S005 and his three flush brothers are the highest for docility in the Angus breed. 3 sons will be offered in this Sale.

Vertex V023 is a real power and grunt bull. Yes, of course the Nuttella's feature at the start of this Sale as well. V023 needs to be admired for his powerful head and jaw, length of body, strong spine, bone, power and performance. He is packed full of weight. He will add extra kgs into your calves at sale time equalling more dollars. His half brothers have sold to \$24,000. Great Granddam of V023, Champagne C154, topped our Belles of Banquet female sale at \$30,000 and is still active.

U512 is very aptly named Unbeatabull. U512 is exactly what we were wanting to achieve with this combination of Sensation S005 and Lucky P363. He has the same wide top, muscularity, thickness, softness and docility that made his sire create a lot of interest prior to selling for \$65,000 to Mountain Valley Angus in our Spring 2022 Bull Sale. U512 also includes the fantastic traits of a strong spine, smooth shoulder, sleek skin, softness, length and doing ability from his dam. His dam Lucky P363, is one of our favourite donor cows. She is a typical Moonshine daughter with her extra length, lovely udder and milk quality. U512 includes some of our best breeders in Nuttella N462, Quiet Y091, Moonshine M42, Lucky P363 and Lucky L334. If you want a bull to produce a consistent line of sons or a line of magnificent replacement females U512 is well worth your inspection. His two flush sisters are planned to join our E.T program this year. Half brother to Lot 11. **Semen retained.**

Vegemite V011 is another very soft and easy doing son of super sire Nuttella N462. V011 is as soft as butter and also as thick as Vegemite. He has a powerful head and jaw with a strong spine and wide top. V011 is another star young sire with a gold pedigree of proven genetics. His sire, Nuttella, has had sons sell for \$65,000, \$64,000, \$62,000 and \$60,000. The consistency of his progeny is unmatched. Dam of V011, Lowan H126, was the star of the Anvil Dispersal. She was purchased with Bannaby Angus for the top price of \$52,000. She is still active in our donor team. A flush sister to V011, Lowan V012, created a lot of interest at the World Angus Expo and we later sold a half share in her to Jones Farms Angus for \$50,000.

SUITABLE FOR JOINING MAIDEN HEIFERS

Lot 17 to Lot 27 have been selected on:

Type – long necks, fine shouldered and moderate bone.

Pedigree – They are sired by proven calving ease sires that have been used by Banquet.

Birth Weight – All these bulls are in the low to moderate actual birth weight range.

EBV – EBV’s of these lots are in the low to moderate range for birth weight EBV.

Remember – Management of the heifers has the greatest impact on calving difficulties.

HIOL23 AYRVALE MITTAGONG L23^{PV}
STRATHEWEN EVIDENT MITAGONG H42^{PV}

Following on from the previous lot, V034 is a direct son of donor cow Mittagong L23. Another son of L23, Top Deck T020 topped our Spring 2023 Bull Sale at \$42,000 to Londavra Angus. Sire of V034, Qanga Q238, was retained as a successful heifer bull for his low birth and smooth shoulder set. V034 offers the same calving ease traits with a smooth front and extra length. He is also strong spined and sleek skinned. **Should be suitable for joining maiden heifers.**

A neat, stylish and classy bull in V017. He is powerful headed with a hooded eye. V017 is strong spined, deep and thick. He is as soft as butter while maintaining muscularity, capacity and hindquarter shape. A bull that could thrive in so many environments. Now I better start on his pedigree, yes another predictable Nuttella son. Nuttella stamps width into every calf, regardless of dam size. Dam of V017 has had sons sell to \$18,000 and \$16,000. Granddam of V017, Quiet H492, has been an elite donor with several daughters in our E.T programs and many sons have had stud use. Her sons have sold to \$64,000. Also to add V017 was born and raised as a twin to Lot 8. It is very exciting to have pedigrees like this at the end of the Sale. Twin brother to Lot 8.

Buying a bull is an investment. This investment should contribute to the genetics and sale income of your herd for many years. If you are to get the most from your new bull, it pays to look after him well, especially in the first season of use. This report discusses management strategies to maximise the productive life of your bulls.

Arrival:

New bull buyers are often concerned about the apparent bad temperament of a bull that seemed quiet enough when purchased. Bulls can become upset and excited in the sale and delivery process. They are subjected to strange yards, different noises, loss of their mates, different people, different handling methods, trucking, unloading, new paddocks and different water and feed. This can upset animals which are normally very quiet.

When the bull arrives home, unload him at the yards into a group of cows or steers. Never jump the bull from the back of a truck into a paddock. Bulls from different origins should be put into separate yards with other cattle, steers or cows, for company.

Provide hay and water, then leave the bull alone until the next day, before giving routine health treatments.

Mating New Bulls:

Newly purchased young bulls should not be multiple joined with older herd bulls. They will not be allowed to work much and in keeping them away from the cows, the older, dominant bull will knock them around.

Use new bulls in either single sire groups or with other young bulls their own age. If a number of young bulls are to be used together, run them together for a few weeks before joining starts. They sort out their pecking order quickly and have fewer problems later.

The Australian Association of Cattle Veterinarians (AACV) defines a normal, fertile bull as “expected to get 90% of 50 normal, cycling, disease free females pregnant within 9 weeks, and 60% of these should become pregnant in the first three weeks of joining”. This expectation would apply to 2 year old bulls, but not to younger bulls.

During Mating:

Check bulls at least twice each week. Watch them work if possible and pay particular attention to any sign of abnormal serving problems like “corkscrew penis” or too many cows returning to heat.

Have a spare bull or bulls available to replace any that break down. If you have to replace a bull, get the bull checked by your vet. Sometimes prompt treatment for small problems can avoid culling. Vendors that provide guarantees on their bulls will usually require a veterinary certificate indicating the problem with unsatisfactory bulls.

Rotate bulls in single sire groups to make sure that any bull infertility is covered. Single sire joining works well but it has risks. The bulls must be checked regularly and carefully or the bulls rotated every one or two cycles.

Attention Buyer

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

Parent Verification Suffixes

The animals listed within this catalogue including its pedigree, are displaying a Parent Verification Suffix which indicates the DNA parent verification status that has been conducted on the animal. The Parent Verification Suffixes that will appear at the end of each animal's name.

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV : both parents have been verified by DNA.

SV : the sire has been verified by DNA.

DV : the dam has been verified by DNA.

: DNA verification has not been conducted.

E : DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

Privacy Information

In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by Angus Australia in certain circumstances. If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must complete the form included below and forward it to Angus Australia. If the form is not completed, the buyer will be taken to have consented to the disclosure of such information.

BUYERS OPTION TO OPT OUT OF DISCLOSING PERSONAL INFORMATION TO ANGUS AUSTRALIA

If you do not complete this form, you will be taken to have consented to Angus Australia using your name, address and phone number for the purposes of effecting a change of registration of the animal(s) that you have purchased, maintaining its database and disclosing that information to its members on its website.

I, the buyer of animals with the following idents.....

from member.....(name) do not consent to Angus Australia using my name, address and phone number for the purposes of effecting a change of registration of the animals I have mentioned above that I have purchased, maintaining its database and disclosing that information to its members on its website.

Name: Signature:

Date:

Please forward this completed consent form to Angus Australia, 86 Glen Innes Road, Armidale NSW 2350.

If you have any questions or queries regarding any of the above, please contact Angus Australia on (02) 6773 4600 or email office@angusaustralia.com.au

Biosecurity and health information

- Has the owner stated above owned all the cattle in this consignment since birth?

☐ Y ☐ N
- Does the property of origin have a completed on-farm biosecurity plan?

☐ Y ☐ N
- 3a. Have these cattle been tested for the presence of pestivirus antigen?
If tested, were any cattle found to be persistently infected?

☐ Y ☐ N ☐ Y ☐ N
- 3b. Have these cattle been tested for the presence of pestivirus antibody?
If tested what percentage of the tested cattle were antibody positive?

☐ Y ☐ N
4. Has the property of origin had an occurrence of clinical Johne's disease (JD) in any species in the past five years?

☐ Y ☐ N ☐ Unsure
5. On the property of origin, have cattle been co-grazed with dairy cattle?
See explanatory note for advice on co-grazing with non-bovine species

☐ Y ☐ N ☐ Unsure
6. Has the source herd had a JD test?
If so, which test?
Was the result negative?

☐ Y ☐ N ☐ Pending ☐ Sample Test ☐ Date 26 / 6 / 18
7. If dairy cattle, the consignment has a Dairy Assurance Score of:

☐ Part A (herd base score) ☐ Part B (calf credits) ☐ Part C (total Dairy Score)
8. Any other relevant health information

Treatments

Treatment type	Product	Date of treatment within last 6 months
Drench or pour-on	Dectomax	August 2025
Liver fluke		
Other treatments	7 in 1, AD&E, Multi Min Evolution	August 2025
	Vibriovax, Pestiguard	August 2025

Current vaccinations for the cattle being moved (see explanatory note)

- Clostridial (e.g. 5 in 1): ☐ Y ☐ Botulism: ☐ Y ☐
- Leptospira (e.g. 7 in 1): ☐ Y ☐ Bovine ephemeral fever: ☐ Y ☐
- Pestivirus: ☐ Y ☐ Tick fever: ☐ Y ☐
- JD (Slirum): ☐ Y ☐ Vibrio: ☐ Y ☐

Other vaccinations (specify):
