

“BELLES OF BANQUET” FEMALE SALE

This is better than a Dispersal Sale - Why?

- ★ With a Dispersal you have the opportunity to purchase all the females. With the ‘Belles of Banquet’ you have the opportunity to purchase all the “B”, “C”, “D” and “E” drop females.
 - They are free of all known genetic disorders
 - They carry the strength of the Banquet prefix
 - They are of a quality worthy of the ‘BB’ brand

Note. All “non carrier” cows that are deemed to be below the high standards set for this sale will be deregistered with Angus Australia within twelve months of this sale.

- ★ Banquet Angus will remain as a very well established brand in the Beef Industry. They will continue to promote their program and their unique cow lines in which you can now share. They will be available for advice and information. With a Dispersal the profile of a stud can quickly diminish to a distant memory and there is no longer term ongoing support from the vendors

- ★ Why Banquet? Banquet achieved the highest average price for both Autumn and Spring bull sales in Victoria this year. A vast majority of that support was from repeat clients who consistently experience outstanding success with their Banquet progeny, with many regularly achieving sale topping results at major selling centres.

This is the first time in the 24 year history of Banquet Angus that a significant number of females have been offered.

It is an opportunity not to be missed – the Best from the Best!
