SALE INFORMATION

VENUE:

Our Spring Bull Sale will be held in the Saleyards, Mortlake, Victoria.

INSPECTION:

We encourage buyers to inspect the bulls prior to sale day. It allows us to assist you select the sire best suited to your needs. Phone us on 0419 884 839 and advise us of your intending visit.

Lots catalogued are available for inspection from 9.00am, Monday 4th September.

FREE DELIVERY:

Banquet offers free delivery to the buyer's nearest town on route to Adelaide, SA and Emerald, QLD and to the property within Vic.

BULL TESTING:

All bulls have passed a comprehensive fertility test conducted by Dr. Craig Wood of Terang Mortlake Veterinary Clinic including –

examination for structural soundness
examination of reproductive organs
measurement of scrotal circumference
SEMEN MOTILITY tested
SEMEN MORPHOLOGY tested

Semen Motility

Sperm cells need to be motile. At about 60um long, they've a way to travel to get the job done. Following collection of a semen sample, a drop is placed on a microscope slide and examined, 'crush side', to assess the percentage of sperm cells moving forward.

Semen Morphology

Morphology is the anatomy or structure of the sperm. It cannot be tested 'crush side' requiring a large specialised laboratory microscope to examine a preserved semen sample, assessing the % normal and % abnormal sperm cells. It can pick up defects in the sperm that 'crush side' testing cannot. The most serious of these defects can see the sperm start to fertilise an egg but fail to result in a viable embryo and the female will fail to fall in calf.

Note that Semen Morphology can differ in subsequent samples from the same bull. Stress can cause this and putting a bull through a sale will generally cause some stress.

THE BANQUET BULL GUARANTEE:

All bulls are backed by a 3 YEAR GUARANTEE. In the event of a bull proven to be incapable of natural service the vendor can either offer a suitable replacement if available or issue a credit for future sales. The credit is a pro-rata value of the bull minus the salvage value. The guarantee can only apply if the bulls' incapacity is not caused by injury or disease since taking delivery. Any claim must be accompanied by a relevant veterinary certificate. The vendor retains the right to obtain independent veterinary confirmation of any claim.

It is important to understand that normal care must be taken and good husbandry practices observed, as we cannot replace a bull that is injured or dies for any reason. As such, we recommend you insure animals against injury. A representative of an insurance service organisation will be available on sale day.

ANIMAL HEALTH

NATIONAL CATTLE HEALTH STATEMENT:

Banquet has its own Biosecurity Plan prepared in conjunction with our local vet Dr Craig Wood. We will remain at J-BAS 8 which is consistent with last years BJDMAP at MN2 level. See page 34 for our National Health Statement.

STOCK HEALTH:

All bulls have been vaccinated with Pestiguard vaccine (pestivirus), Vibriovax (vibriosis), 7 in 1 Vaccine (leptospirosis) and drenched with Paramectin. Any bulls purchased for Queensland will be vaccinated against 3 day sickness and receive the 3 germ tick vaccine upon request.

RECESSIVE GENETIC CONDITIONS (see pages 28 and 29)

All bulls in this Sale are free of AM, NH, CA and DD by parentage, or have been tested free. Waiting for results for Lots 9, 20, 27 and 37. Results will be available on Sale Day.

NO CARRIER BULLS ARE BEING OFFERED FOR SALE

REBATE TO OUTSIDE AGENTS:

Outside agents accompanying a purchaser to the sale are entitled to a 5% rebate. Please refer to page 4 for further detail.

AFTER SALE SERVICE:

Banquet is renowned for excellence in providing after sales service. If in doubt, speak with us or with any one of our many satisfied clients.

FURTHER INFORMATION:

Contact Stephen or Noeleen Branson by phoning 0419 884 839 or 0437 029 992
or Email banquetangus@westvic.com.au

NEXT BULL SALE: THURSDAY 22ND FEBRUARY 2018

100 BULLS

OUTSIDE AGENT COMMISSION REBATES

5% rebate will be paid to all agents that attend and who purchase with or on behalf of their clients and settle within seven days of sale date.

2% rebate will be paid to all agents introducing clients that purchase but not accompanied by them to the sale. A written introduction must be received by the vendor 48 hours prior to the sale and accounts must be settled within 7 days of the sale date.

SIGHT UNSEEN PURCHASING PROGRAM

100% satisfaction guarantee.

Available to buyers who cannot attend the Sale.

For those purchasers who have discussed their requirements with us prior to the Sale we offer a 100% money back guarantee if the purchaser is not completely satisfied with their purchase. We must be notified within seven days of taking delivery. However the purchaser will be responsible for return transport costs.

BANQUET FEATURE SIRES

MILLAH MURRAH JUPITER J194

B/R New Design 036 (USA)
Sire: BOOROOMOOKA THEO T030
 Booroomooka Quaint Q34

Millah Murrah Equator D78
Dam: MILLAH MURRAH FLOWER F126
 Millah Murrah Flower B76

We are excited with the first progeny of J194. He is increasing the width of loin and hindquarter of his calves while maintaining the "Banquet" shape. They are fine skinned and soft coated. They sold to \$16,000 in this Autumn Sale. The pedigree of J194 combines some of the most proven bloodlines from Millah Murrah, Theo, D78 and Hingaia 469. Jupiter J194 is owned by Pheasant Creek Brangus and resides in Central Queensland.

ANVIL FUSION F275

WK Vegas (USA)
Sire: WK REPLAY (USA)
 SAF Penelope P020 (USA)

Glenoch Megaforce M16+92
Dam: TE MANIA Y147
 Te Mania Lowan V70

We purchased the \$17,000 Fusion as our pick of a very impressive group of E.T brothers. Fusion attracted us with his strong loin, wide hindquarter and rugged head. His dam is equally impressive, she is deep bodied, soft and easy doing. Her progeny are consistently at the top end of their contemporary group. If Fusions daughters inherit the traits of Y147 they will be very valuable to our program. Fusion sons have proved very popular. J285 sold for \$15,000 in 2015 and K312 topped our 2016 Autumn Sale at \$21,000.

BANQUET FEATURE SIRES

BANQUET EVERARD E019

Banquet Time Frame Y135
Sire: BANQUET BALLIS B017
 Banquet Mavis Y032

Banquet Zema Z032
Dam: BANQUET DREAM B509
 Banquet Dream Y259

The first daughters of Everard E019 have proved to be such exceptional matrons that E019 is now being used heavily. His sons are deep and thick with huge capacity. They are strong headed with powerful jaws and show extra softness. These are cattle that easily finish on grass. The pedigree of E019 matches his phenotype. He is sired by the exceptional Ballis B017. His grand dam is a flush sister to the almighty Dream W173. Who is the dam of Forbidabull F485.

BANQUET JHETT J426

Banquet Collective C351
Sire: BANQUET FADDIST F238
 Banquet Lass C219

Hingaia 469 (NZ)
Dam: BANQUET DREAM G489
 Banquet Dream Y301

Jhett J426 is one of the most exciting young sires at Banquet. He is moderate framed with excellent muscularity. He is easy doing with exceptional structure. He gives us confidence that he could thrive with high work loads in any conditions. J426 supercedes his sire as our choice of sires descending from Right Time 24J. His dam, Dream G489, may be our most valuable donor at present. She has enormous capacity and her progeny are exceptional. Another son, L352, is also in use at Banquet. G489 is a daughter of Hingaia 469 and Vermont Dream Y301, the greatest cow to come from Vermont.

S GLORIA 464

BANQUET ZEALFUL Z021
VOND235 BANQUET CAROLYN D235 (AI)
BANQUET CAROLYN B006 (AI) (ET)

A magnificent high growth bull to start this sale. L251 has exceptional strength of head, jaw and bone. He is a high headed powerful young sire prospect. Note the excellent hooding on his eyes. Noleen found Chisum during a tour of USA and we have been delighted with the substance and weight of his progeny. D235, dam of L251, is a big cow with extra extension. She has produced superior progeny with every sire she has been joined to.

 BANQUET DREAM G238

Like Lot 28, L278 only returned from joining commercial heifers on the 2nd August. Again a son of the proven calving ease sire, H467. H467 was selected by Warranboo Partnership and is still in service. L278 calving ease credentials are strengthened further with his grand sire Fleet F024. F024 proves you dont have to sacrifice length, frame or growth to achieve calving ease if the structure and type is correct.

IMPORTANT NOTICES FOR PURCHASERS

~ SALE CATALOGUE DISCLAIMER ~

All reasonable care has been taken by the vendor to ensure that the information provided in this catalogue is correct at the time of publication. However, neither the vendor nor the selling agents make any other representations about the accuracy, reliability or completeness of any information provided in this catalogue and do not assume any responsibility for the use or interpretation of the information included in this catalogue. You are encouraged to seek independent verification of any information contained in this catalogue before relying on such information.

~ DNA PATERNITY VERIFICATION ~

It is a requirement of Angus Australia that all bulls used to sire calves for registration in the Angus Australia Herd Book Register, Red Angus Register or Angus Performance Register must have been DNA paternity verified if they are born in or after the 'Y' year (2003). Buyers intending to use bulls listed in this catalogue to produce calves to be registered in these registers should obtain DNA paternity verification on those bulls before they are used for breeding.

~ PRIVACY INFORMATION ~

In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by Angus Australia in certain circumstances. If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must complete the form included below and forward it to Angus Australia. If the form is not completed, the buyer will be taken to have consented to the disclosure of such information.

BUYER'S OPTION TO OPT OUT OF DISCLOSING PERSONAL INFORMATION TO THE ANGUS AUSTRALIA

If you do not complete this form, you will be taken to have consented to Angus Australia using your name, address and phone number for the purposes of effecting a change of registration of the animal(s) that you have purchased, maintaining its databases and disclosing that information to its members on its website.

I, the buyer of animals with the following registration numbers from member (name) do not consent to Angus Australia using my name, address and phone number for the purposes of effecting a change of registration of the following animal(s) that I have purchased, maintaining its databases and disclosing that information to its members on its website.

Signature:

Date:

Please forward this completed consent form to Angus Australia, Glen Innes Road, Locked Bag 11, Armidale NSW 2350. If you have any queries, please telephone 02 6772 3011 or e-mail office@angusaustralia.com.au.

RECESSIVE GENETIC CONDITIONS

INFORMATION FOR BULL BUYERS

This is information for bull buyers about the recessive genetic conditions, Arthrogryposis Multiplex (AM), Hydrocephalus (NH), Contractural Arachnodactyly (CA) and Developmental Duplications (DD).

Putting undesirable Genetic Recessive Conditions in perspective

All animals, including humans, carry single copies (alleles) of undesirable or “broken” genes. In single copy form, these undesirable alleles usually cause no harm to the individual. But when animals carry 2 copies of certain undesirable or “broken” alleles it often results in bad consequences. Advances in genomics have facilitated the development of accurate diagnostic tests to enable the identification and management of numerous undesirable or “broken” genes. Angus Australia is proactive in providing its members and their clients with relevant tools and information to assist them in the management of known undesirable genes and our members are leading the industry in their use of this technology.

Key point: With today’s DNA tools undesirable genetic conditions can be managed!

What are AM, NH, CA and DD?

AM, NH, CA and DD are all recessive conditions caused by “broken” alleles within the DNA of individual animals. When a calf inherits 2 copies of the AM or NH alleles their development is so adversely affected that they will be still-born.

In other cases, such as CA and DD, calves carrying 2 copies of the broken allele may reach full-term. In such cases the animal may either appear relatively normal, or show physical symptoms that affect their health and/or performance.

Key point: The number of reported observations of AM, NH, CA and DD calves is very low and there is certainly no need for panic.

How are the conditions inherited?

Research in the U.S. and Australia indicates that AM, NH, CA and DD are simply inherited recessive conditions. This means that a single gene (or pair of alleles) controls the condition. For this mode of inheritance two copies of the undesirable allele need to be present before the condition is seen; in which case you may get an abnormal calf. A more common example of a trait with a simple recessive pattern of inheritance is black and red coat colour.

Animals with only one copy of the undesirable allele (and one copy of the normal form of the allele) appear normal and are known as “carriers”.

What happens when carriers are mated to other animals?

Carriers, will on average, pass the undesirable allele to a random half (50 %) of their progeny.

When a carrier bull and carrier cow is mated, there is a 25% chance that the resultant calf will inherit two normal alleles, a 50% chance that the mating will result in a carrier (i.e. with just 1 copy of the undesirable allele, and a 25% chance that the calf will inherit two copies of the undesirable gene.

If animals tested free of the undesirable gene are mated to carrier animals the condition will not be expressed at all. All calves will appear normal, but approximately half (50%) could be expected to be carriers.

Key point: For the condition to be expressed the undesirable gene needs to be present on both sides of the pedigree and both the sire and dam need to be a carrier.

How is the genetic status of animals reported?

DNA-based diagnostic tests have been developed which can be used to determine whether an individual animal is either a carrier or free of the alleles resulting in AM, NH, CA or DD.

Angus Australia uses advanced software to calculate the probability of (untested) animals to being carriers of AM, NH, CA or DD. The software uses the test results of any relatives in the calculations and the probabilities may change as new results for additional animals become available.

The genetic status of animals is being reported using five categories:

AMF	Tested AM free
AMFU	Based on pedigree AM free – Animal has not been tested
AM__%	__% probability the animal is an AM carrier
AMC	Tested AM-Carrier
AMA	AM-Affected

For NH, CA and DD, simply replace AM in the above table with NH, CA or DD.

Registration certificates and the Angus Australia web-database display these codes. This information is displayed on the animal details page and can be accessed by conducting an “Animal Search” from the Angus Australia website or looking up individual animals listed in a sale catalogue.

Key point: The genetic status of an animal is subject to change and will be re- analysed and adjusted each week as DNA test results of relatives are received.

Implications for Commercial Producers

Your decision on the importance of the genetic condition status of replacement bulls should depend on the genetics of your cow herd (which bulls you previously used) and whether some female progeny will be retained or sold as breeders.

Most Angus breeders are proactive and transparent in managing known genetic conditions, endeavouring to provide the best information available.

Key point: The greatest risk to the commercial sector from undesirable genetic recessive conditions comes from unregistered bulls with unknown genetic background.

The genetic condition testing that Angus Australia seedstock producers are investing in provides buyers of registered Angus bulls with unmatched quality assurance.

For further information contact Angus Australia’s Breed Development and Innovation Manager at (02) 6773 4602.

Your partner.

Next time you are thinking about a partner for your livestock business, think Elders. We know the market; we understand what clients need and what your clients will need too. We offer services tailored to the needs of primary producers and we also have a range of product solutions to support agribusiness.

Our aim is to help farmers like you make the most of their farming business by making more possible. That's why Elders is the right choice if you need expert help with the business of farming.

Local advice that makes a world of difference.

At Landmark, you can rely on a vast network of committed advisors who have the resources and the expertise for all your livestock needs. Our combined experience and our knowledge of the livestock industry, means we can add real value to your business and help you make the most of every opportunity. We understand the buying and selling of sheep and cattle, and with access to more domestic markets and international partnerships, we can secure better prices for you. That's why more Australian farmers look to us.

Insurance Brokers

FARM INSURANCE

Protect your farm business and your assets with an insurance policy tailored to meet your needs.

Breakwater Insurance can arrange competitive premiums and cover for commercial dairy, beef, sheep and cropping enterprises.

We offer professional, on-farm advice relating to:

- Livestock mortality
- Farm buildings and contents
- Home and contents
- Farm machinery and machinery breakdowns
- Livestock, hay, fencing and farm trees
- Liability
- Motor vehicles (all types)
- Theft
- Accident and illness
- Business interruption.

NATIONAL CATTLE HEALTH DECLARATION

Version
24/10/2016

Owner of cattle S & N Branson
(Full trading name)

Property/place where the journey commenced 420 Fosters Lane
(Address) Mortlake VIC 3272
(Address continued) (Town/suburb) (State) (Postcode)

Property Identification Code (PIC) of this property
This MUST be the PIC of the property that the stock is being moved from
3 M Y N L 0 4 3

Details of other statutory documents relating to this movement e.g. NVD
NVD 33478851
(Document type) (Document number) (Office of issue) (Expiry date)
Note: If NVD accompanying this declaration then you may go straight to question 1

Description of cattle		
Number	Description (Breed, sex e.g. Hereford Cross Steers)	Brands or Earmarks
38	Angus Bulls	
	Total	

Consigned to Various Buyers
(Name of person or business)

(Address) (Town/suburb) (State) (Postcode)

Destination (if different) of cattle (location address)

1. Has the owner stated above owned these cattle since birth?
Yes No

2. On the property stated above, has an on-farm biosecurity plan been implemented?
Yes No
If yes, which plan (e.g. Farm Biosecurity, LPA, Grazing BMP) Farm Biosecurity, LPA

3a. Have these cattle been tested for the presence of pestivirus antigen? Yes No
If tested, were any cattle found to be persistently infected? Yes No

3b. Have these cattle been tested for the presence of pestivirus antibody? Yes No
If tested what percentage of the tested cattle were antibody positive?

4. Enzootic Bovine Leucosis (EBL) test result for animals being moved:

Date of test/...../.....

5. Are the cattle from an EBL accredited or certified free herd: Yes No

6. Are these cattle from a herd or property with an occurrence of Johne's disease (JD) in any susceptible species within the last five years?
Yes No Don't know J-BAS of (optional)

7. On the property stated above, have cattle been co-grazed with dairy cattle and/or sheep?
Yes No Don't know

8. Source herd has a negative JD test result: Check Test Sample Test
Date of test 20/12/14

9. If dairy cattle, the consignment has a Dairy Assurance Score of:
Part A (herd base score) Part B (calif credits) Part C (total Dairy Score)

Treatments	Product	Date of treatment within last 6 months
Drench	Paramectin	28/04/2017
Liver fluke treatment		
Other treatments (type)	AD&E, Multimin	28/04/2017

11. Current vaccinations for the cattle being moved (see explanatory note)

Clostridial vaccination (e.g. 5 in 1): Yes Clostridial vaccination (Botulism) : Yes

Pestivirus vaccination: Yes Bovine ephemeral fever vaccination: Yes

Leptospiira vaccination: Yes Vibrio vaccination: Yes

JD (Silirum) vaccination: Yes

Other vaccinations (specify):

12. Any other relevant health information

DECLARATION (see explanatory notes for further information)

I, Noeleen Elizabeth Branson P.O Box 166
(Full name) (Full address)

Mortlake VIC 3272
(Address continued) (Town/suburb) (State) (Postcode)

declare that I am the owner or the person responsible for the husbandry of the cattle and that all the information in this document is true and correct. I also declare that I have read and understood all the questions that I have answered, that I have read and understood the explanatory notes, and that I have inspected the animals and deem them to be healthy, free of disease and fit to travel.

Signature* Date 28/07/2017
*Only the person whose name appears above may sign this declaration, or make amendments which must be initiated.
