SALE INFORMATION

VENUE:

This Bull Sale will be held at Banquet, 420 Fosters Lane, Mortlake, Victoria.

INSPECTION:

We encourage buyers to inspect the bulls prior to sale day. It allows us to assist you select the sire best suited to your needs. Phone us on 0419 884 839 and advise us of your intending visit.

Lots catalogued are available for inspection from 1.00pm, Thursday 22nd February.

FREE DELIVERY:

Banquet offers free delivery to the buyer's nearest town on route to Adelaide, SA and Emerald, QLD and to the property within Vic.

BULL TESTING:

All bulls have passed a comprehensive fertility test conducted by Dr. Craig Wood of Terang Mortlake Veterinary Clinic including –

examination for structural soundness
examination of reproductive organs
measurement of scrotal circumference
SEMEN MOTILITY tested
SEMEN MORPHOLOGY tested

Semen Motility

Sperm cells need to be motile. At about 60um long, they've a way to travel to get the job done. Following collection of a semen sample, a drop is placed on a microscope slide and examined, 'crush side', to assess the percentage of sperm cells moving forward.

Semen Morphology

Morphology is the anatomy or structure of the sperm. It cannot be tested 'crush side' requiring a large specialised laboratory microscope to examine a preserved semen sample, assessing the % normal and % abnormal sperm cells. It can pick up defects in the sperm that 'crush side' testing cannot. The most serious of these defects can see the sperm start to fertilise an egg but fail to result in a viable embryo and the female will fail to fall in calf.

Note that Semen Morphology can differ in subsequent samples from the same bull. Stress can cause this and putting a bull through a sale will generally cause some stress.

THE BANQUET BULL GUARANTEE:

All bulls are backed by a 3 YEAR GUARANTEE. In the event of a bull proven to be incapable of natural service the vendor can either offer a suitable replacement if available or issue a credit for future sales. The credit is a pro-rata value of the bull minus the salvage value. The guarantee can only apply if the bulls' incapacity is not caused by injury or disease since taking delivery. Any claim must be accompanied by a relevant veterinary certificate. The vendor retains the right to obtain independent veterinary confirmation of any claim.

It is important to understand that normal care must be taken and good husbandry practices observed, as we cannot replace a bull that is injured or dies for any reason. As such, we recommend you insure animals against injury. A representative of an insurance service organisation will be available on sale day.

ANIMAL HEALTH

NATIONAL CATTLE HEALTH STATEMENT:

Banquet has its own Biosecurity Plan prepared in conjunction with our local vet Dr Craig Wood. We will remain at J-BAS 8 which is consistent with last years BJDMAP at MN2 level. See page 77 for our National Cattle Health Declaration.

STOCK HEALTH:

All bulls have been vaccinated with Pestiguard vaccine (pestivirus), Vibriovax (vibriosis), 7 in 1 Vaccine (leptospirosis) and drenched with Paramectin. Any bulls purchased for Queensland will be vaccinated against 3 day sickness and receive the 3 germ tick vaccine upon request.

RECESSIVE GENETIC CONDITIONS (see pages 70 & 71)

All bulls in this Sale are free of AM, NH, CA and DD by parentage, or have been tested free.

NO CARRIER BULLS ARE BEING OFFERED FOR SALE

REBATE TO OUTSIDE AGENTS:

Outside agents accompanying a purchaser to the sale are entitled to a 5% rebate. Please refer to page 4 for further detail.

AFTER SALE SERVICE:

Banquet is renowned for excellence in providing after sales service. If in doubt, speak with us or with any one of our many satisfied clients.

FURTHER INFORMATION:

Contact Stephen or Noeleen Branson by phoning 0419 884 839 or 0437 029 992
or Email banquetangus@westvic.com.au

The Branson family of Noeleen, Stephen, Gordon, Dianna and Hamish take great pride in presenting their stock to you

OUTSIDE AGENT COMMISSION REBATES

5% rebate will be paid to all agents that attend and who purchase with or on behalf of their clients and settle within seven days of sale date.

2% rebate will be paid to all agents introducing clients that purchase but not accompanied by them to the sale. A written introduction must be received by the vendor 48 hours prior to the sale and accounts must be settled within 7 days of the sale date.

SIGHT UNSEEN PURCHASING PROGRAM

100% satisfaction guarantee.

Available to buyers who cannot attend the Sale.

For those purchasers who have discussed their requirements with us prior to the Sale we offer a 100% money back guarantee if the purchaser is not completely satisfied with their purchase. We must be notified within seven days of taking delivery. However the purchaser will be responsible for return transport costs.

WHY SO MANY PHOTOS?

This catalogue features more photos of Sale Lots than usual. With the time, frustration and cost why do we bother? Because this pictorial catalogue highlights some of the benefits of Big Bold Banquet Bulls that pedigrees and EBVs alone can not.

CONSISTENCY

As we strive to produce more consistent lines of bulls to offer to you clients, we see the evenness of your lines of sale cattle improving. Therefore more money in your pockets. Buy multiple bulls from Banquet and the variation in the progeny will be minimal.

LONGEVITY

Disregarding accidents, the biggest cause of break downs or early culling is poor structure. Correct structure improves calving ease, fertility, growth and do-ability. All the survivability traits. Don't underestimate the benefits of correct structure. We hope you find this catalogue of pedigrees, EBVs, comments and photos both helpful and enjoyable.

In closing Noeleen, Gordon, Dianna, Hamish and I wish you all a safe and kind 2018.
We look forward to sharing February 22nd with as many as possible.

Please plan to stay after the sale to enjoy our hospitality.

ANOTHER PIC

A typical Banquet bull

**Strong head and jaw, heavy boned, fine skin, soft coat, muscular and thick.
Banquet Kane K233 retained at Banquet and heavily used.
Half brother to Lot 17. Sire of Lot 69 with many more sons in 2019.**

At the recent Thomas Foods International Angus Junior Roundup, The Vice-Chairman of Angus Aust., Mr Brad Gilmour gave a short address. His target audience were young people but I was so impressed with the message that, with his permission, I have re-printed part for your interest. I believe his message is relevant for us all.

Changes

When I started farming, I used to saddle a horse to go out and check the livestock. In a few years, a drone might do it all for you. It's remarkable to see how far technology has come. And a bit daunting for those of us who will struggle to change our ringtone. But while lot's have changed, some things haven't.

That's what I'd like to talk about tonight.

Three things I hope you find useful wherever life takes you.

Overnight success takes 10 years

Everyone is in a big rush these days. There's a lot of pressure to be successful at a younger age. But the truth is, there's no shortcut to success. It's as difficult to achieve today as it was a hundred years ago.

You'll need to be resilient and patient if you're going to be successful. You'll make mistakes along the way. I certainly have. But mistakes teach you a great deal about yourself.

Work hard, be kind to people and don't give up.

Do something you love

What sparks your curiosity? Is it Angus cows? Or canola crops? Maybe it's protecting the environment or running an organic veggie farm.

Whatever it is, go for it. The world doesn't need any more people in jobs they hate. That's where grumpy people come from.

Just remember, doing what you love doesn't mean you won't have bad days. There'll be times when you want to chuck a sickie, or throw in the towel. But if it's important to you, you'll get past the struggles and have a very rewarding life.

And finally,

Share your knowledge

When I think about the people who've made the biggest difference in my life, they are teachers.

Even when you finish school, you'll have teachers for the rest of your life. They might be people you work with, a neighbour down the road, or someone you meet on the train. They could be twice your age or a lot younger than you.

It's important to stay curious and learn all you can. Because I guarantee you, one day someone will see you as their teacher.

150 COMMERCIAL HEIFERS RISING TWO YEARS - PTIC A/C Robbie & Marg Patterson

Sourced from leading Banquet Clients
Correlup, Glenferrie, Nangana, Webb,
Wimmera Downs, Winniburn and Woodlands

Traits Observed: BWT,200WT,600WT(X2),FAT,EMA,IMF

Lascelles L022 was purchased by Robbie Patterson at 11 months of age for \$16,000. Semen was used at Banquet and calves born in Autumn '17 from maidens confirm him as an elite calving ease bull. They were born quickly and without assistance. As an individual, L022, shows excellent fleshing and smoothness. He is fine shouldered with soft skin and hair. His dam featured in our Belles of Banquet Female Sale and sold for \$17,000.

BANQUET FEATURE SIRE

BANQUET JUPITER J263

Banquet Day Dream D053
Sire: BANQUET FORBIDABULL F485
 Banquet Dream W173

Banquet Yawning Y279
Dam: BANQUET DREAM A356
 Banquet Dream Y281

This outstanding sire prospect topped our 2015 Autumn Bull Sale at \$40,000. He was purchased by Richard and Sandra Retallack, Glengowan Stud, NSW. Jupiter J263 is strong headed with a well hooded eye. He is long, thick and muscular, recording our highest EMA scan. Jupiter's foot structure and temperament are exceptional. He was our first son of Forbidabull F485 to be offered for sale. Forbidabull F485 topped our 2012 Sale to Doug and Barb Tozer, Onslow Stud, NSW. A son of F485 topped the 2015 Onslow Sale at \$16,000.

BANQUET FORBIDABULL F485

Banquet Xtra Belief X030
Sire: BANQUET DREAM D053
 Banquet Dream V104

Hingaia 469 (NZ)
Dam: BANQUET DREAM W173
 Banquet Kiwi Dream M41+92

Forbidabull F485 is a real Banquet bull. Only a few sons in this Sale but they are outstanding. The strength of head and jaw, body capacity, thickness and muscularity of his progeny is exceptional. F485 is proof that line breeding works. He traces three times to the legendary Kiwi Dream M41. His dam Dream W173 is our top Dream donor. Her ten sons have sold to \$26,000 and averaged \$10,300. Forbidabull sons topped at \$40,000 at Banquet and \$16,000 at Onslow.

BANQUET FEATURE SIRE

BANQUET JAMBEROO J507

Wittalocka X10
Sire: BANQUET DUNCAN D412
 Banquet Dream A250

Banquet Abode A005
Dam: FORRES WILCOOLA D107
 Lochton Y004

Jamberoo J507 is a very exciting young sire at Banquet. He has an exceptional phenotype. He has a powerful head, huge capacity and a long, thick and deep hindquarter. All this adds up to weight and lots of it. These Duncan sons and daughters have lots of weight and pass it to their progeny. A half brother to J507, H511, was also used at Banquet. Their grand sire, Abode A005, topped our Sale at \$20,000 to Forres Stud. At their Dispersal we repurchased him for \$22,000 in conjunction with Quarterway and Shingle Hut.

BANQUET JEFOIL J205

Banquet Collective C351
Sire: BANQUET FADDIST F238
 Banquet Lass C219

Banquet Ballis B017
Dam: BANQUET WIVEM F500
 Banquet Wivem W190

For those seeking more cover without compromising frame but with exceptional calving ease these J205 sons are the answer. J205 had our highest fat scans in the 2018 drop of bulls. His sire, F238, was our pick of the C351 sons who in turn was our favourite 24J. J205 was purchased for \$20,000 by Warranboo with Banquet retaining an interest.

BANQUET FEATURE SIRES

BANQUET JINDABYNE J296

Sire: BANQUET FREDERICK F683 Dam: BANQUET JULIE W164

Jindabyne J296 is an outstanding sire. Standing at Toora West he continues to impress with his capacity, muscularity and mobility. His calves shape these traits at both Toora West and Banquet and their weaning weights are stunning. J296 is our choice to continue the Frederick F683 line. He is from Julie W164 who is still sound, youthful and pregnant at 16 years of age. J296 is a half brother to G464, another Banquet Sire.

Lot 31: Banquet M281 - Son of J296

ANGUS	DIR	DTRS	GL	Bwt	200	400	600	Mwt	Milk	SS	DC	Cwt	EMA	Rib	Rump	RBY%	IMF%

BANQUET JHETT J426

Sire: BANQUET FADDIST F238 Dam: BANQUET DREAM G489

Jhett J426 is one of the most exciting young sires at Banquet. He is moderate framed with excellent muscularity. He is easy doing with exceptional structure. He gives us confidence that he could thrive with high work loads in any conditions. J426 supersedes his sire as our choice of sires descending from Right Time 24J. His dam, Dream G489, may be our most valuable donor at present. She has enormous capacity and her progeny are exceptional. Another son, L352, is also in use at Banquet. G489 is a daughter of Hingaia 469 and Vermont Dream Y301, the greatest cow to come from Vermont. forward to see how his sons (catalogued here), calves turn out.

ANVIL FUSION F275

Sire: WK REPLAY Dam: TE MANIA Y147

We purchased the \$17,000 Fusion as our pick of a very impressive group of E.T brothers. Fusion attracted us with his strong loin, wide hindquarter and rugged head. His dam is equally impressive, she is deep bodied, soft and easy doing. Her progeny are consistently at the top end of their contemporary group. If Fusions daughters inherit the traits of Y147 they will be very valuable to our program. Fusion sons have proved very popular. J285 sold for \$15,000 in 2015 and K312 topped our 2016 Autumn Sale at \$21,000.

BANQUET FEATURE SIRES

BANQUET EVERARD E019

Sire: BANQUET BALLIS B017 Dam: BANQUET DREAM B509

The first daughters of Everard E019 have proved to be such exceptional matrons that E019 is now being used heavily. His sons are deep and thick with huge capacity. They are strong headed with powerful jaws and show extra softness. These are cattle that easily finish on grass. The pedigree of E019 matches his phenotype. He is sired by the exceptional Ballis B017. His grand dam is a flush sister to the almighty Dream W173. Who is the dam of Forbidabull F485.

ANGUS	DIR	DTRS	GL	Bwt	200	400	600	Mwt	Milk	SS	DC	Cwt	EMA	Rib	Rump	RBY%	IMF%

BANQUET ZAPPA Z236

Sire: DYLEMMA RADAR W42 Dam: BANQUET DREAM V104

Zappa Z236 produced our most outstanding group of females in the 'F' year. Several of these have been included in our embryo transfer program. It is the performance of these females that encouraged us to re-introduce Z236 into our program. His sons in this Sale offer exceptional muscularity with fine hair and soft skins. But most important is the maternal attribute of the daughters they will produce. Zappa Z236 is a half brother to other Banquet sires. Xplanation X060, Day Dream D053 and Dream Boy D055. Zappa was sold to Brad Saunders where he worked for three years in Central Qld. before returning to the deep South.

Lot 35: Banquet M197 - Son of Z236

MERCHISTON STOKER 350

Sire: STOKMAN DASH G89 (USA) Dam: MERCHISTON BLACKBIRD 972 (NZ)

Stoker was an outstanding prospect when he was purchased by Atahua Stud for \$26,000 at the 2015 Merchiston Sale. His progeny in N.Z will feature in this years Sales. Stoker was strong headed with a powerful jaw. He had depth and thickness. He was only lightly sampled at Banquet but quality of his progeny will encourage us to continue to use him.

The daughters of D053 feature in our herd for their quality and soundness. That is why we re-introduced him into our program. M388 also has tremendous depth of breeding on his dam side. J412 is a daughter of D345. His daughters are sound and easy doing, often with the most condition and more shine than any others in the mob. The dam of J412, F493, is outstanding. Sleek, easy doing and very productive.

 BANQUET YENDI P05

M161 is the first son of the mighty Legacy to be offered for many years. Although sold way back in 1992 Legacy still holds the Australasian Auction Record at \$155,000. Of far greater note is the influence he and his progeny have had on the Banquet herd and our clients herds. M161 is strong headed and deep barrelled with extra loin. But it is the longevity and maternal power that makes him exciting. His dam G288 was structurally exquisite and had exceptional fertility. She produced four daughters in 12 months without embryo transfer. She is sired by the famous Hingaia 469. Her dam, P05, was our most outstanding pure Aust/NZ dam. She retired at 18 years and still has nine daughters in the herd.

WK REPLAY
 HBUF275 ANVIL FUSION F275 (AI) (ET)
 TE MANIA Y147 (AI)

Wow! M374 is a really thick and muscular young bull to be this late in the Sale. We selected F275 for his soundness, thickness, temperament and the maternal power of his dam. The same as we do with all our sires.

RECESSIVE GENETIC CONDITIONS

INFORMATION FOR BULL BUYERS

This is information for bull buyers about the recessive genetic conditions, Arthrogryposis Multiplex (AM), Hydrocephalus (NH), Contractural Arachnodactyly (CA) and Developmental Duplications (DD).

Putting undesirable Genetic Recessive Conditions in perspective

All animals, including humans, carry single copies (alleles) of undesirable or “broken” genes. In single copy form, these undesirable alleles usually cause no harm to the individual. But when animals carry 2 copies of certain undesirable or “broken” alleles it often results in bad consequences. Advances in genomics have facilitated the development of accurate diagnostic tests to enable the identification and management of numerous undesirable or “broken” genes. Angus Australia is proactive in providing its members and their clients with relevant tools and information to assist them in the management of known undesirable genes and our members are leading the industry in their use of this technology.

Key point: With today's DNA tools undesirable genetic conditions can be managed!

What are AM, NH, CA and DD?

AM, NH, CA and DD are all recessive conditions caused by “broken” alleles within the DNA of individual animals. When a calf inherits 2 copies of the AM or NH alleles their development is so adversely affected that they will be still-born.

In other cases, such as CA and DD, calves carrying 2 copies of the broken allele may reach full-term. In such cases the animal may either appear relatively normal, or show physical symptoms that affect their health and/or performance.

Key point: The number of reported observations of AM, NH, CA and DD calves is very low and there is certainly no need for panic.

How are the conditions inherited?

Research in the U.S. and Australia indicates that AM, NH, CA and DD are simply inherited recessive conditions. This means that a single gene (or pair of alleles) controls the condition. For this mode of inheritance two copies of the undesirable allele need to be present before the condition is seen; in which case you may get an abnormal calf. A more common example of a trait with a simple recessive pattern of inheritance is black and red coat colour.

Animals with only one copy of the undesirable allele (and one copy of the normal form of the allele) appear normal and are known as “carriers”.

What happens when carriers are mated to other animals?

Carriers, will on average, pass the undesirable allele to a random half (50 %) of their progeny.

When a carrier bull and carrier cow is mated, there is a 25% chance that the resultant calf will inherit two normal alleles, a 50% chance that the mating will result in a carrier (i.e. with just 1 copy of the undesirable allele), and a 25% chance that the calf will inherit two copies of the undesirable gene.

If animals tested free of the undesirable gene are mated to carrier animals the condition will not be expressed at all. All calves will appear normal, but approximately half (50%) could be expected to be carriers.

Key point: For the condition to be expressed the undesirable gene needs to be present on both sides of the pedigree and both the sire and dam need to be a carrier.

How is the genetic status of animals reported?

DNA-based diagnostic tests have been developed which can be used to determine whether an individual animal is either a carrier or free of the alleles resulting in AM, NH, CA or DD.

Angus Australia uses advanced software to calculate the probability of (untested) animals to being carriers of AM, NH, CA or DD. The software uses the test results of any relatives in the calculations and the probabilities may change as new results for additional animals become available.

The genetic status of animals is being reported using five categories:

AMF	Tested AM free
AMFU	Based on pedigree AM free – Animal has not been tested
AM__%	__% probability the animal is an AM carrier
AMC	Tested AM-Carrier
AMA	AM-Affected

For NH, CA and DD, simply replace AM in the above table with NH, CA or DD.

Registration certificates and the Angus Australia web-database display these codes. This information is displayed on the animal details page and can be accessed by conducting an “Animal Search” from the Angus Australia website or looking up individual animals listed in a sale catalogue.

Key point: The genetic status of an animal is subject to change and will be re-analysed and adjusted each week as DNA test results of relatives are received.

Implications for Commercial Producers

Your decision on the importance of the genetic condition status of replacement bulls should depend on the genetics of your cow herd (which bulls you previously used) and whether some female progeny will be retained or sold as breeders.

Most Angus breeders are proactive and transparent in managing known genetic conditions, endeavouring to provide the best information available. The greatest risk to the commercial sector from undesirable genetic recessive conditions comes from unregistered bulls with unknown genetic background. The genetic condition testing that Angus Australia seedstock producers are investing in provides buyers of registered Angus bulls with unmatched quality assurance.

For further information contact Angus Australia’s Breed Development and Innovation Manager at (02) 6773 4602.

IMPORTANT NOTICES FOR PURCHASERS

~ SALE CATALOGUE DISCLAIMER ~

All reasonable care has been taken by the vendor to ensure that the information provided in this catalogue is correct at the time of publication. However, neither the vendor nor the selling agents make any other representations about the accuracy, reliability or completeness of any information provided in this catalogue and do not assume any responsibility for the use or interpretation of the information included in this catalogue. You are encouraged to seek independent verification of any information contained in this catalogue before relying on such information.

~ DNA PATERNITY VERIFICATION ~

It is a requirement of Angus Australia that all bulls used to sire calves for registration in the Angus Australia Herd Book Register, Red Angus Register or Angus Performance Register must have been DNA paternity verified if they are born in or after the 'Y' year (2003). Buyers intending to use bulls listed in this catalogue to produce calves to be registered in these registers should obtain DNA paternity verification on those bulls before they are used for breeding.

~ PRIVACY INFORMATION ~

In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by Angus Australia in certain circumstances. If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must complete the form included below and forward it to Angus Australia. If the form is not completed, the buyer will be taken to have consented to the disclosure of such information.

BUYER'S OPTION TO OPT OUT OF DISCLOSING PERSONAL INFORMATION TO THE ANGUS AUSTRALIA

If you do not complete this form, you will be taken to have consented to Angus Australia using your name, address and phone number for the purposes of effecting a change of registration of the animal(s) that you have purchased, maintaining its databases and disclosing that information to its members on its website.

I, the buyer of animals with the following registration numbers from member (name) do not consent to Angus Australia using my name, address and phone number for the purposes of effecting a change of registration of the following animal(s) that I have purchased, maintaining its databases and disclosing that information to its members on its website.

Date:

Please forward this completed consent form to Angus Australia, Glen Innes Road, Locked Bag 11, Armidale NSW 2350. If you have any queries, please telephone 02 6772 3011 or e-mail office@angusaustralia.com.au.

Breakwater

Insurance Brokers

FARM INSURANCE

Protect your farm business and your assets with an insurance policy tailored to meet your needs.

Breakwater Insurance can arrange competitive premiums and cover for commercial dairy, beef, sheep and cropping enterprises.

We offer professional, on-farm advice relating to:

- Livestock mortality
- Farm buildings and contents
- Home and contents
- Farm machinery and machinery breakdowns
- Livestock, hay, fencing and farm trees
- Liability
- Motor vehicles (all types)
- Theft
- Business interruption.

LANDMARK

BRINGING A NEW BULL HOME

Buying a bull is an investment. This investment should contribute to the genetics and sale income of your herd for many years. If you are to get the most from your new bull, it pays to look after him well, especially in the first season of use. This report discusses management strategies to maximise the productive life of your bulls.

Arrival

New bull buyers are often concerned about the apparent bad temperament of a bull that seemed quiet enough when purchased. Bulls can become upset and excited in the sale and delivery process. They are subjected to strange yards, different noises, loss of their mates, different people, different handling methods, trucking, unloading, new paddocks and different water and feed. This can upset animals which are normally very quiet.

When the bull arrives home, unload him at the yards into a group of cows or steers. Never jump the bull from the back of a truck into a paddock. Bulls from different origins should be put into separate yards with other cattle, steers or cows, for company.

Provide hay and water, then leave the bull alone until the next day, before giving routine health treatments.

Mating new bulls

Newly purchased young bulls should not be multiple joined with older herd bulls. They will not be allowed to work much and in keeping them away from the cows, the older, dominant bull will knock them around.

Use new bulls in either single sire groups or with other young bulls their own age. If a number of young bulls are to be used together, run them together for a few weeks before joining starts. They sort out their pecking order quickly and have few problems later.

The Australian Association of Cattle Veterinarians (AACV) defines a normal, fertile bull as “expected to get 90% of 50 normal, cycling, disease free females pregnant within 9 weeks, and 60% of these should become pregnant in the first three weeks of joining”. This expectation would apply to 2 year old bulls, but not to younger bulls.

During mating

Check bulls at least twice each week. Watch them work if possible and pay particular attention to any sign of abnormal serving problems like “corkscrew penis” or too many cows returning to heat.

Have a spare bull or bulls available to replace any that break down. If you have to replace a bull, get the bull checked by your vet. Sometimes prompt treatment for small problems can avoid culling. Vendors that provide guarantees on their bulls will usually require a veterinary certificate indicating the problem with unsatisfactory bulls.

Rotate bulls in single sire groups to make sure that any bull infertility is covered. Single sire joining works well but it has risks. The bulls must be checked regularly and carefully or the bulls rotated every one or two cycles.

NATIONAL CATTLE HEALTH DECLARATION

Version

Note: If NVD accompanying this declaration then you may go straight to question 1

Description of cattle		Brands or Earmarks
Number	Description (Breed, sex e.g. Hereford Cross Steers)	
100	Angus Bulls	
100	Total	

Consigned to Various Buyers
(Name of person or business)
(Address) (Town/suburb) (State) (Postcode)

Destination (if different) of cattle (Location address)

1. Has the owner stated above owned these cattle since birth?
Yes No

2. On the property stated above, has an on-farm biosecurity plan been implemented?
Yes No
If yes, which plan (e.g. Farm Biosecurity, LBN, BioCheck)

3a. Have these cattle been tested for the presence of pestivirus antigen?
If tested, were any cattle found to be persistently infected? Yes No
Yes No

3b. Have these cattle been tested for the presence of pestivirus antibody?
If tested what percentage of the tested cattle were antibody positive? Yes No
Yes No

4. Enzootic Bovine Leucosis (EBL) test result for animals being moved:

Date of test/...../.....

5. Are the cattle from an EBL accredited or certified free herd: Yes No

6. Are these cattle from a herd or property with an occurrence of Johne's disease (JD) in any susceptible species within the last five years?
Yes No Don't know J-BAS of EIGHT (optional)

7. On the property stated above, have cattle been co-grazed with dairy cattle and/or sheep?
Yes No Don't know

8. Source herd has a negative JD test result: Check Test Sample Test
Date of test 20/12/14

9. If dairy cattle, the consignment has a Dairy Assurance Score of:
Part A (herd base score) Part B (calf credits) Part C (total Dairy Score)

Treatments	Product	Date of treatment within last 6 months
Drench	Paramectin	05/12/2017
Liver fluke treatment		
Other treatments (type)	AD&E, 7 in 1	05/12/2017

11. Current vaccinations for the cattle being moved (see explanatory note)
Clostridial vaccination (e.g. 5 in 1): Yes Clostridial vaccination (Botulism): Yes
Pestivirus vaccination: Yes Bovine ephemeral fever vaccination: Yes
Leptospira vaccination: Yes Vibrio vaccination: Yes
JD (Sillirum) vaccination: Yes
Other vaccinations (specify):

12. Any other relevant health information

DECLARATION (see explanatory notes for further information)
